Thread: [\[TuT\] \[HQ\] How to Setup nJrat V0.7D\[TuT\] \[With Pictures\]](#)

NoodleBot™ - January 17, 2014, 12:06 am

Advertisement

If you are going to be involving yourself with any Keylogger, RAT, stresser, bruteforce or cracker tool, definitely consider some form of protection to cover yourself.

Check out my latest program Absolution, aimed at providing a safer environment and settings that are easy to configure.

Hey there. I'm seeing a lot of frustration, with new members as well as some of our experienced users having trouble setting up these RAT's.

I want to end these struggles today by giving you all this simple easy to follow walk through. Just follow basic steps.. and you have your RAT setup. I will make a separate walk through for CybgerGate, and BlackShades, and all other RAT's I come across that people are having trouble with, as well as port-forwarding. Today I write these tutorials so that I may link customers to a safe place to learn!

-How to Setup nJrat 0.7 -

By

NoodleBot™

Steps before proceeding

Ensure you have a RAT to work with here.

nJrat 0.7 - <https://hackforums.net/showthread.php?tid=3924408>

Ensure your antivirus is turned off completely before using the RAT. When your antivirus software is on, it will detect the RAT and add an injection detection. Basically, by saying this, I mean that it will send a copy of your RAT server to it's manufacturer. So if you have Avira, turn it off, or you will see more Avira detections. Etc etc etc. Very simple rule, and this universal rule applies for all types of malware and cryptography.

-nJrat Server Instructions-

Step 1:

Click on the Builder button and configure your No-ip address/VPN address and port. Then choose the options like I have below.

Name your server and your good to go.

You should succeed!

Your server is essentially now ready to crypt and ready for its next stages. I will release another thread on port-forwarding soon - stay posted.

whyso - January 17, 2014, 12:35 am

What Kind of VPN did you used in to setup RAT! Thanks For Sharing :)
Regards,

Dagh0st - January 17, 2014, 1:44 pm

nice tutorial cant wait to see more

joelmand - January 17, 2014, 1:50 pm

thanks for sharing this tut.. keep them coming>!

Pi_Rat - January 17, 2014, 1:51 pm

nice tut my friend with good details ,, good work my friend, thanks for share

captainfrisky - January 25, 2014, 11:50 am

Where do you save the server at when you click build?

NoodleBot™ - January 25, 2014, 5:18 pm

(Jan 25, 2014 12:50 PM)captainfrisky Wrote: [\[CITE\]](#) Where do you save the server at when you click build?

Wherever you want to save it. Preferably in the same folder to make sure you don't lose it.

captainfrisky - January 25, 2014, 6:49 pm

Anyone getting a unhandled exception has occurred in your application? Anyone know how to fix it?

vinylscratch - January 25, 2014, 10:50 pm

Thanks for sharing this helped me out alot.

ulan - January 26, 2014, 12:33 am

i done following all the instruction, but why cant see anything in my RAT?thanks

NoodleBot™ - January 29, 2014, 9:10 pm

(Jan 25, 2014 07:49 PM)captainfrisky Wrote: [\[CITE\]](#) Anyone getting a unhandled exception has occurred in your application? Anyone know how to fix it?

You have an outdated version of the Microsoft .net Framework, try Windows Updating first.

(Jan 26, 2014 01:33 AM)ulan Wrote: [\[CITE\]](#) i done following all the instruction, but why cant see anything in my RAT?thanks

Please refer to my other walkthroughs for this issue.

[TuT] [HQ] How to Test Your Malware For Connection [TuT] [With Pictures]

Elizabeth.Company - January 29, 2014, 9:35 pm

How are you?

Thank you for your good tutorial

KnockSteadys - February 2, 2014, 3:21 pm

thanks this a cool tut on how to do this it will help alot

Malcolm.Woodchop - March 31, 2014, 6:36 pm

I have followed these instructions but cannot see the rat. I am putting my no-ip host name which is something.no-ip.biz right? I am sure because of i use 127.0.0.1 it works. So what do i do?

NoodleBot™ - March 31, 2014, 6:54 pm

That's right, however you may* not see your own computer listed on your malware,

* This is dependent on your network. Some networks allow this, whilst some don't. This isn't a problem however.

What I would suggest you do, is build a separate server with 127.0.0.1 to verify you can recieve connection with that server.

If all runs smoothly, you're ready to go (With the no-ip server)

Malcolm.Woodchop - March 31, 2014, 6:58 pm

(Mar 31, 2014 06:54 PM)NoodleBot™ Wrote: [\[CITE\]](#) That's right, however you may* not see your own computer listed on your malware,

If all runs smoothly, you're ready to go (With the no-ip server)

I did use 127.0.0.1 and it did work i am just having trouble with when its my host name their. Its not showing up or connecting then.

NoodleBot™ - March 31, 2014, 7:00 pm

It won't work on yourself sometimes. If you have a friend who can run your no-ip server or use a VM you can test it

Malcolm.Woodchop - March 31, 2014, 7:02 pm

(Mar 31, 2014 07:00 PM)NoodleBot™ Wrote: [\[CITE\]](#) It won't work on yourself sometimes. If you have a friend who can run your no-ip server or use a VM you can test it

Just as you replied i finished testing it on my brother. It did not work. Thanks for your help by the way i appreciate it.

NoodleBot™ - March 31, 2014, 7:03 pm

Is your brother on the same network as you? That is the problem most likely. Send me your teamviewer information.

Malcolm.Woodchop - March 31, 2014, 7:06 pm

Yes. ok however i cant pm you I do not have 25 posts could you pm me your skype and i will give you the information from their.

Edit:

Nevermind you were correct. I asked my friend to run it and it worked on his PC. Thank you for your

help NoodleBot i appreciate it. By the way how do i +rep you.

NoodleBot™ - March 31, 2014, 7:54 pm

Sorry for the delays. I forgot to subscribe to this thread.

Unfortunately on HackForums only l33t's and Ub3r's can leave reputation on HackForums users.

Some more information is located here; <https://hackforums.net/misc.php?action=help&hid=13>

It is more of a forum donor item, you don't have to feel obligated to do so or for me either.

Glad I was able to solve this problem. Good luck!

No need for reputation, is satisfaction enough.

warcotex - April 19, 2014, 4:53 am

what port can i put in my Rat? i'm noob!! please!!!

NoodleBot™ - April 19, 2014, 8:55 am

Whatever port you like and are able to port forward through your router or vpn service.

imakeitrainy - April 19, 2014, 8:57 am

easy to use, but the keylogger recorder is terrible for me? any advice? is Rat works on other languages?

zuwelitting20 - April 21, 2014, 3:12 am

i try V0.7D and get it to work, but it really hard to see with black background is there a way to change the background color ?

jhacob40 - November 12, 2014, 10:36 pm

its not working on me can someone teach me

NoodleBot™ - November 12, 2014, 10:37 pm

I've sent you a message. You may or may not be able to PM back with 2 posts however.

jhacob40 - November 13, 2014, 3:39 am

sir its working now. if i send the server.exe to someone i can access their pc right? :O or they need to run sa no-ip something so it will work?

NoodleBot™ - November 13, 2014, 10:22 am

No only you need noip or an alternative. Your good to go. Get a crypters to make the file less or fully undetectable.

jackwyer - March 29, 2015, 6:38 am

It's all set up now all I need is to make it FUD and get a crypter. What crypter do you recommend me to get? How do I make it FUD

KingwondA - March 29, 2015, 6:42 am

I have set up now all, thanks man for the guide.

Now I need a crypter and then let's test it :D

2K15 - March 29, 2015, 7:44 am

Great tutorial. But I have something wrong with my RAT. I already tested it on someone's computer and it's not showing up here on njRAT. Could someone help me? Thanks! :)

jackwyer - March 29, 2015, 11:12 am

What's a good crypter to put on njRAT?

AnonymousPlayer - March 29, 2015, 11:30 am

Nice tutorial, lots of good detail, thankyou!

NoodleBot™ - March 30, 2015, 11:04 am

(Mar 29, 2015 07:44 AM)brokelyne Wrote: [\[CITE\]](#) Great tutorial. But I have something wrong with my RAT. I already tested it on someone's computer and it's not showing up here on njRAT. Could someone help me? Thanks! :)

You need to ensure your ports are forwarded and your network/DNS/VPN is set up properly.

raul42 - March 30, 2015, 1:03 pm

Why is that better than dc?,,,,,,,,,,,,,

MrHoTsHoTzZ - March 30, 2015, 3:13 pm

So when i build my app and test run it to make sure on windows 8 it says what do you want to open this with can anyone help me with this, it started yesterday

Thanks in advance :)

NoodleBot™ - March 30, 2015, 4:11 pm

(Mar 30, 2015 03:13 PM)MrHoTsHoTzZ Wrote: [\[CITE\]](#) So when i build my app and test run it to make sure on windows 8 it says what do you want to open this with can anyone help me with this, it started yesterday

Thanks in advance :)

Windows 8 does not support a lot a of applications designed for Windows 7 and lower.

CanisMajoris - April 2, 2015, 8:33 am

When will the next part of the TUT be done?

NoodleBot™ - April 2, 2015, 1:45 pm

Done a long time ago. Sorry.

batshitinsane - April 2, 2015, 6:02 pm

Haven't read to many good things about no-ip, any good alternatives?

PoisonKnife - April 2, 2015, 7:03 pm

(Apr 2, 2015 06:02 PM)batshitinsane Wrote: [\[CITE\]](#) Haven't read to many good things about no-ip, any good alternatives?

Buy a domain with bitcoins and forward it to the IP-address of your VPN.

Then use the the domain as your host.

raul42 - April 3, 2015, 12:11 pm

(Apr 2, 2015 07:03 PM)PoisonKnife Wrote: [\[CITE\]](#) Buy a domain with bitcoins and forward it to the IP-address of your VPN.

what that means? using the domain as a host?
what IP should we type in network setting in dc ?

batshitinsane - April 4, 2015, 6:37 pm

(Apr 2, 2015 07:03 PM)PoisonKnife Wrote: [\[CITE\]](#) Buy a domain with bitcoins and forward it to the IP-address of your VPN.

GamingFTWHD - August 19, 2015, 12:05 pm

I am trying all RAT and non are working for me! I can't even infect myself! I am pressing my build and I can see it where the RAT should install but I can't see anything on the client???

feedzshadow - August 20, 2015, 7:39 am

portforwarding istthat hard right just add ur ip and do random port number like 1337 as you used add comment and done?

(Aug 19, 2015 12:05 PM)GamingFTWHD Wrote: [\[CITE\]](#) I am trying all RAT and non are working for me! I can't even infect myself! I am pressing my build and I can see it where the RAT should install but I can't see anything on the client???

Try to open the file location of njrat there you wil find your server. atleast thats how i found mine. last thing to do get this ez portforwarding under control haha i think thats your issue 2 because you need an open port and the same port inthe builder to connect i think.

Rubenshire - January 25, 2016, 7:06 pm

I followed the instructions and used the IP from No-Ip but it still wont work. HELP

NoodleBot™ - January 25, 2016, 8:57 pm

(Jan 25, 2016 08:06 PM)Rubenshire Wrote: [\[CITE\]](#) I followed the instructions and used the IP from No-Ip but it still wont work. HELP

Look into using a different DNS service and you will have better results. No IP should not be used anymore.

KickAss942 - January 25, 2016, 11:10 pm

Thanks a lot for sharing this, I had no idea it could be done like this!

selenal - April 9, 2016, 7:27 am

does this rat work on windows10?

Cokeboy - April 9, 2016, 10:12 am

Great tutorial. But I have something wrong with my RAT, I think.

memesaregreat - April 9, 2016, 10:14 am

njrat is fine
not many features
not darkcomet
6/10
Useful tut tho

NoodleBot™ - April 9, 2016, 10:58 am

(Apr 9, 2016 07:27 AM)selena1 Wrote: [\[CITE\]](#) does this rat work on windows10?

No it probably will not without special steps taken.

(Apr 9, 2016 10:12 AM)Cokeboy Wrote: [\[CITE\]](#) Great tutorial. But I have something wrong with my RAT, I think.

Message me and I can help to figure it out

Uptake - April 9, 2016, 1:02 pm

Nice tutorial. Easy to use RAT.

Cokeboy - April 9, 2016, 6:21 pm

Nice tutorial, lots of good detail, thank you!

1theragexx - April 1, 2017, 3:13 pm

okay guys when i klick on my njrat it doesn't open it says "njrat has stopped working" what is the problem? :(

NoodleBot™ - April 2, 2017, 9:39 pm

(Apr 1, 2017 03:13 PM)1theragexx Wrote: [\[CITE\]](#) okay guys when i klick on my njrat it doesn't open it says "njrat has stopped working" what is the problem? :(

Make sure you are running the program as administrator. Turn off any antivirus software you have installed as well as make sure that you have the .net framework 2.0 installed when building your server (and using the client)

barcathebest201 - April 4, 2017, 6:19 am

Omg thank you so much dude. It's taken me forever to figure this out, thanks for sharing!

festimii - May 6, 2017, 1:26 am

You can use openvpn comunity edittion for port opening and pm if you want config...

KeyLogging - May 6, 2017, 2:01 pm

what vpn do you use?

thank you

Isa96de - May 25, 2017, 6:17 am

Thanks do you have a good Crypter for njrat?

Hopsin - May 25, 2017, 11:48 am

I don't need this but thanks for your contribution buddy! Have a nice day ?

NoodleBot™ - May 25, 2017, 12:22 pm

Thanks for your comment on my guide!

Trusted precious - March 2, 2018, 1:47 am

Nvpn you just download from their site when your logged in. You'll have access to the servers that you paid for in your plan. My Skype doesn't work but feel free to send me a message here

Ashley1988 - March 6, 2018, 7:05 pm

thanks for sharing this tut.. keep them coming>!

Trusted precious - March 22, 2018, 5:27 am

I'm a Beginner i need i don't know how to config openvpn community edition for port opening, Pls can someone help me?

xblwolf - March 23, 2018, 9:18 pm

Thanks for sharing This, good tutorial.

HunterZero - April 23, 2018, 7:42 am

Very nice tutorial, still the link to download Njrat is dead...

If you have any legit download link can you share it or send on PM?

Crak3r - April 23, 2018, 9:26 am

Veri nice thanks for share....

darkvendetta1 - April 23, 2018, 12:54 pm

i have njrat set up, windows defender always kills it, have to run it without. i imagine if you start spreading it you would need it be runtime fud or windows defender will kill it

NoodleBot™ - April 23, 2018, 8:27 pm

(Apr 23, 2018 12:54 PM)darkvendetta1 Wrote: [\[CITE\]](#) i have njrat set up, windows defender always kills it, have to run it without. i imagine if you start spreading it you would need it be runtime fud or windows defender will kill it

First of all, you should not have any antivirus system including windows defender on your machine when building, crypting or spreading. Whatever you have installed is constantly searching your computer even without your permission and will send your files back for analysis, giving you detections before you even start spreading.

Uninstall those applications and start over.

And yes, before spreading you need to make sure that your server is UD or FUD. Buy a private crypter or modify your own source code to one. Ones that are sold here or sold it to hundreds of other people with the same idea in the same spreading method and they become quite useless when there are so many people using
