Thread: [For the GFX Designers that Utilize Flat Designs](#)

Cesar Morales - January 17, 2014, 7:06 am

I found this site via Google, and thought that it would help out the people who enjoy making the, "flat" designs in their GFX.

I have found this site very, very useful in my situation... and I hope that it helps you as well.

By "utilize flat design" do you mean bad Photoshop users who pretend to be professional by claiming basic work as minimalism?
