Drop can be a bit better, but it is my first big room attempt.

Antinormality - January 18, 2014, 4:08 am

Als je wil mag je me ff je skype PM'en :p.

Overall, your melodies are great, the idea with the melody in the drop is okay needs a heavier synth tho.

The Kick if you use FL throw the Fruity Waveshaper over it, in Ableton get the Saturator out and put that in Waveshaper mode.

Then Distort it abit and throw a limiter/compressor on it (Fabfilter Pro L is my fave).

I've used fabfilter for some equilizing, I am using ableton. Got to work on heavier synth's indeed for my next tracks.
