Thread: [Exploit packs](#)

bobo5555 - January 17, 2014, 3:05 pm

Can someone explain to me how exploit packs work exactly? I know im a noob for not knowing this but hey you gotta start somewhere.

Also could someone show me an exploit pack rental they're usually extremely expensive but I want to see some sellers.

Hi Mate

I am not entirely sure of the inner workings of an exploit pack however it is a means to infecting visitors of a web page by testing their software for vulnerabilities in order to deliver a payload to infect the user.

I would advise against buying exploit kits from this forum in all honesty, you are liable to be, at best taken advantage of or at having your wallet emptied and spent on cocaine for someone else's nostrils...

I have seen exploit packs starting at £450 per month into the thousands per month, Plus you also need to consider how you will get traffic (users) to the kit in order to test for vuln's to exploit.

Hope this helps

there any exploit kit for free?

if yes plz pm

Thanks

Not that aren't detected by every AV on the planet with exploits so old that your grandparents reminisce about them.
