Thread: [Any good bruteforce to bruteforce admin pass?](#)

?clipse™ - January 18, 2014, 5:26 am

So I'm trying to bruteforce the admin pass and was wondering if there is a program that can bruteforce admin pass using cmd eg. it types: net user administrator *

pass

pass

and tries all combinations. I don't know if this is possible and so i'm curious because it doesn't boot from usb, i tried ophcrack..

thanks.

i personally use brutus. To Configure Brutus.Put the target IP address.Put in the userlist and the passlist.After everything is ok,Fire the START Tab.

You should use Sentry MBA and use your brain to find a good config dependently of the targeted website.
