Thread: [Is uTorrent trustworthy?](#)

Gasp - January 18, 2014, 5:27 am

Well, the title says it all really.

Is uTorrent a trustworthy torrent download client?

Sinatraa - January 18, 2014, 5:27 am

Ofcourse is it, its amazing and the best torrent program

bssbig - January 18, 2014, 5:28 am

what problem do you have with utorrent? of course it is trustworthy

?ing - January 18, 2014, 5:30 am

uTorrent is trustworthy, but what you download may or may not be trustworthy. Just be careful when downloading torrents off the internet.

SIM-1224560 - January 18, 2014, 5:31 am

Well I don't get why it wouldn't be....

Gasp - January 18, 2014, 5:34 am

I was just wondering. I've used it before on my old computer but it never bought any issues although my brother seems to have convinced himself that its malicious.

Thanks for the replies.

Corso - January 18, 2014, 5:55 am

(Jan 18, 2014 06:30 AM)?idan Wrote: [\[CITE\]](#) uTorrent is trustworthy, but what you download may or may not be trustworthy. Just be careful when downloading torrents off the internet. This exactly. A lot of torrents are packaged with viruses, however the uTorrent program itself is safe and legitimate.

WARNING: Person-To-Person ProgramsI'd like to inform you of the risks of such actions and choices. Although there are legal torrents, more often than not P2P programs are used for illegal downloads and often times have very high risks. A very large portion of common infections are spread through the downloading of torrents or other illegally downloaded digital items.

Although the P2P programs are not directly responsible for any of the infections, we highly recommend your remove them or use them very carefully.

With that being said I'd like to point you to two articles that discuss the risks of P2P or file-sharing technologies in more detail, in which I hope you take the time to review before making the decision to keep or uninstall the P2P software from your machine.

[P2P file sharing: Know the risks \(From Microsoft\)](#)

[Risks of File-Sharing Technology \(From US Computer Emergency Readiness Team or US-CERT for short\)](#)

WARNING: Illegal Downloads & Software It is also one of the most common ways for malware to spread and infect machines. Key/serial generators or cracks are some of the most common items to have malicious software embedded into them, as they often pop false positives even if they have no malicious intent or items. So when they do come up as infected, they are often ignored or allowed anyway. To find out more, you can review the following links for more specific details: [Using pirated software? Swashbuckling with risk!](#)

[Net providers begin warning of illegal downloads](#)

Thanks for the replies.

Your brother has probably downloaded malicious torrents, so it is really his own fault.

This is the best answer you'll get.

Think if it's really worth to use uTorrent before starting a download.

Dropbox - January 18, 2014, 6:52 am

i think utorrent is one of the best torrenting clients

i would recommend this to everyone, however it also depends on what torrents you download
be sure to check the seeders and reviews before downloading something

Aura - January 18, 2014, 9:12 am

As Corso says, uTorrent is a trustable torrent client. The only danger using it, is the torrents you download. So if you use your brain and Common Sense 2k14, you won't get infected when download torrents.

Corso - January 18, 2014, 10:59 am

Thanks for the vouches, I think it's a good enough post to have some good information and proof to convey the points needed.

Crashed - January 18, 2014, 1:01 pm

uTorrent itself is safe, however torrents have a high risk of being infected. Download always at your own risk. The highest seeded one isn't always the better one.

Gustav - January 18, 2014, 7:21 pm

Corso's reply is the best one you'll get. I am beat to even reply with something better a the moment. Take care and steer clear from P2P programs in generally.

#Thunder - January 18, 2014, 7:45 pm

If you are wanting safer download alternatives, newsgroups are probably the best thing out there. With that being said, those services are often paid for.

Gustav - January 18, 2014, 7:48 pm

Why are you quoting me sir? You should be telling this to the OP. not me, I am aware.

Oak? - January 18, 2014, 7:50 pm

(Jan 18, 2014 08:48 PM)Chief? Wrote: [\[CITE\]](#) Why are you quoting me sir? You should be telling this to the OP. not me, I am aware.

I was wondering the same thing.

I saw his reply and was like what does this have to do with my friend Chief's post.

Gustav - January 18, 2014, 7:53 pm

Someone called for the RAT of the White Hat Help section ?

RoadKillRage - January 18, 2014, 10:09 pm

I can vouch, utorrent is trustworthy. I have been using it since 2009.

NewEraCracker - January 19, 2014, 7:00 am

The uTorrent application is trustworthy at some point. What you download using it may not be, depending where it came from.

I also recommend removing ads from uTorrent:

<http://www.wikihow.com/Remove-Sponsored-Ads-from-uTorrent>

Gasp - January 19, 2014, 7:25 am

Thanks for all the replies.

<http://www.wikihow.com/Remove-Sponsored-Ads-from-uTorrent> Didn't know you could do that. Thanks for the tip!

Gustav - January 19, 2014, 7:50 am

Good luck with whatever Gasp, be safe & steer clear from Malware content.
