Thread: [\[LIVE STREAM CODING: OFFLINE\]Cloud Net - Beta \[NEW FREE RAT\] \(Download Included\)](#)

Coding4Noobs - January 18, 2014, 10:43 am

LIVE STREAM: [OFFLINE](#) <-- CLICK HERE TO VIEW

Recently many of you know I had to stop {Emissary} Solutions due to lack of 1) Income and 2) time. I told my customers if I was unable to sell {Emissary} Solutions I would then release a new RAT in which would be free, thus the birth of the cloud net project.

Cloud Net BETA, is the beta form a new RAT being developed in C#.

you will be able to access all updates from this blog: <http://cloudnetbeta.blogspot.ca/>

Please note the the project is far from done and isn't expected to be anywhere near done until later this summer.

In the mean time, I need some help with beta testing... so I'll be releasing different versions of the project through out the next few months for testing.

If you find any bugs I'd appreciate it if you could pm me the issue that occurred and how it has happened.

Anyways if you wish to beta test, you must have .NET 4.5 installed.

(when the beta is finished, we will remove the .NET 4.5 dependency and make it .NET 2.0 or 4.5 (optional).

Anyways if you are interested in trying it out, you can download it from the blog here: <http://cloudnetbeta.blogspot.ca/>

Some more pictures: Spoiler ([Click to View](#))

nbaprofo - January 18, 2014, 10:47 am

Nice to see you're back mate. Keep up the amazing work.

Coding4Noobs - January 18, 2014, 1:42 pm

Live stream of development has been added to the top of the thread,.

¹³³**7** - January 18, 2014, 1:53 pm

Watching the stream im bored today.. :S

Saduto - January 18, 2014, 3:04 pm

(Jan 18, 2014 02:53 PM)lasski Wrote: [\[CITE\]](#) Watching the stream im bored today.. :S
Me too, haha been working all day and now I don't know what to do...

Jaos - January 18, 2014, 3:07 pm

yay a new rat, thanks man hope its good

Coding4Noobs - January 19, 2014, 10:29 am

Updated OP with more screen shots. Will be live streaming in a few minutes as well.

xtreme07 - January 20, 2014, 9:17 am

What should I do if i need A HWID change for Emissary? I made a ticket on the site but now the site is gone

Hedwig - January 20, 2014, 9:53 am

(Jan 20, 2014 10:17 AM)xtreme07 Wrote: [\[CITE\]](#) What should I do if i need A HWID change for Emissary? I made a ticket on the site but now the site is gone

I'm afraid that {Emissary}NET is over. As Coding4Noobs stated, he can no longer provide for it and attempted to sell the entire project. However, no one bought it so he is starting a new one.

Question for Coding4Noobs: If you are going to start a new RAT why start over when you have the Emissary Source?

EDIT: Well now I see it's coded in C#...

xtreme07 - January 20, 2014, 10:06 am

I pad for the RAT. If anything I would like an HWID change. I don't care about further updates I would just like to at least be able to use the RAT I paid for at it's current version.

Coding4Noobs - January 20, 2014, 2:16 pm

{Emissary} Solutions currently no longer exists as I am unable to provide hosting for it any longer. There was no income being made for a few months, and I ended up investing more money then I made back, thus I am now in debt and unable to host that project.

This project is new, free and wont have that problem.

xtreme07 - January 20, 2014, 2:46 pm

I see that you have no respect for you prior customers. I watched you look right at my post in join.me. I chose your RAT because it looked great and then I didn't use it for a while and came back

with a new computer and I couldn't log in. I just want a simple HWID change or whatever you have to do to let me use the RAT.

Coding4Noobs - January 20, 2014, 5:37 pm
Malware Remover added

major update just released with completed builder and automatic updater.

Coding4Noobs - January 21, 2014, 8:38 pm
Version 1.1 released, check the blog for more details.

JasonFlinn - January 21, 2014, 9:06 pm
Hey man; watched your video, figured I'd try to give you a test run.

For some odd reason, I didn't get a connection, even trying it on myself.
i43.[censored].com/vhc7yc.png
tiny pic ^

Also, the port checker claimed port 9999 was open, when it actually wasn't and claimed 1604 was closed when it was actually open. (both confirmed on canyouseeme.org)

I've used plenty of RAT's before without error... so I'm pretty confident this isn't a problem on my end.
Anyway, hope it helps

Coding4Noobs - January 21, 2014, 10:13 pm
Webcam capturing has been added:

@Jacon try 1.2 (the webcam capturing version)

There was a bug in the reconnection code, maybe that was your issue.

Nice_guyz - January 22, 2014, 1:55 am
i port forward 9999 on my router. and it seems that the port checkers open on 9999 i also try to disable the port forward and it still open. but when i check canyouseeme.org my port 9999 was not open whenever it enable or disable.

Coding4Noobs - January 22, 2014, 9:38 am

If you read on the blog, the port checker is currently only working locally (Meaning it's checking to see if the port is working over LAN). I have to wait until I setup a server in order to do the WAN checks.

Coding4Noobs - January 22, 2014, 6:12 pm
Live streaming online. Will be doing a few things tonight, got about 3 hours to code right now.

Live streaming started. Suggest features / other changes whilst i code via join me

Coding4Noobs - January 24, 2014, 10:28 am
1.4 Released with network stressor. Download it via the application or the blog.

¹³³⁷ - January 24, 2014, 7:27 pm

Thanks for livestreaming coding4noobs.
was waiting for that.

LethalNET - January 24, 2014, 7:48 pm

Watching this stream right now, Really nice looking project and the gui is nice and clean, Good work sir.

Sm1th???? - January 24, 2014, 8:28 pm

Watching it now. It is very interesting to me to see coding like this.

Inkling - January 24, 2014, 8:33 pm

Watching it right now, he's doing the remote audio thing.

Pretty cool.

WACKO - January 24, 2014, 9:06 pm

Watching the stream now. Looks good!

mullinupp - January 25, 2014, 2:34 am

Nice to see that ur back Jordan and i wish you all the luck my friend

Coding4Noobs - January 25, 2014, 9:02 am

Live streaming will start again in like 3 hours. Just heading out to get a hair cut, when i get back. I'll try to get some time in to live stream.

razzazz - January 25, 2014, 8:50 pm

Vouched, this is good. it works already have a few connections, although stablilty may be a problem. It's easy and great for starters!

Coding4Noobs - January 25, 2014, 9:49 pm

what kinda stability issues are you facing?

Jaos - January 26, 2014, 12:32 am

how do you have connections if stealth mode isnt done yet.

mayank_predator - January 26, 2014, 4:37 am

Is the server build cryptable by a crypter. The reason for my question is MI Booter was made in c# and was not cryptable. Could some one verify this before I start spreading.

Coding4Noobs - January 26, 2014, 2:10 pm

Sorry for delay of live streaming im working on a new mini website to put up instead of the blog.

Happy Nerd - January 26, 2014, 2:21 pm

Looks prettie cool goodluck with the mini website and updates ! :)

Coding4Noobs - January 27, 2014, 2:48 pm

(Jan 26, 2014 03:21 PM)Happy Nerd Wrote: [\[CITE\]](#) Looks prettie cool goodluck with the mini website and updates ! :)

thanks the site is about 30% complete right now, I'll be releasing a RAT update tonight or tomorrow. Depends on how much time i manage to squeeze in.

wubulaien - January 31, 2014, 2:06 am

are you going to update your rat someday?
i have several probs.

as i told the starting stub is starting too long on enemys screen.
the fps of desktop screen is nearly 0-1.

Hope for some updates.

Have a nice weekend

stowalone - January 31, 2014, 2:14 am

does it crash on many servers, like if i have 1000 victims

Jaos - February 4, 2014, 7:38 pm

are you gonna update this? you havent updated it in a while

Coding4Noobs - February 4, 2014, 8:23 pm

(Feb 4, 2014 08:38 PM)Jaos Wrote: [\[CITE\]](#) are you gonna update this? you havent updated it in a while

Actaully working on an update tonight, probably be out tomrrow.

Jaos - February 10, 2014, 7:22 pm

nearly done?, this must be a pretty big update

Hedwig - February 22, 2014, 12:37 pm

(Feb 4, 2014 09:23 PM)Coding4Noobs Wrote: [\[CITE\]](#) Actaully working on an update tonight, probably be out tomrrow.

If you finally sold the entire {Emissary} project will this Cloud NET cease to continue? ?

Coding4Noobs - February 22, 2014, 12:43 pm

(Feb 22, 2014 01:37 PM)Hedwig Wrote: [\[CITE\]](#) If you finally sold the entire {Emissary} project will this Cloud NET cease to continue? ?

no why would it. It's a free project.

This means it costs me nothing to host... and i can work on it when i want not when it's needed.

HobbyHacker3000 - December 22, 2014, 4:09 am

Wonderful RAT, nice work man!

Its 100 % Clean!!!!
