Thread: [Portforwarding | 4 Methods | Ultimate Portforwarding Tutorial | Guide](#)

King Cin - January 19, 2014, 6:57 am

[img]http://images.cooltext.com/3555024.png[/img]

Hello members of the R.A.T section on HF.

This will be my tutorial on how to port-forward, I get questions about this almost every day, and I myself know 4 ways to portforward, I will show the 4 methods I know.

? Manual Port-forwarding

? uTorrent Port-forwarding

? VPN Portforwarding

? Portforwarding with a tool

[img]http://imagizer.imageshack.us/v2/800x600q90/12/gkkn.jpg[/img]

Manual Port-forwarding

Manual portforwarding is the method that is the most used. You will find this in probably every R.A.T setup thread on HF, I already wrote this 2 times, so I'll be copying it from my old thread.

Press on the windows button, type in CMD and press enter.

In CMD, type in ipconfig and press enter.

A lot will show up on your screen, but we'll be looking at your default gateway. Open up your browser and write your default gateway address in it.

[img]http://imageshack.com/a/img23/6238/gski.jpg[/img]

If admin/admin doesn't work, ask your parents if they know it, if they don't know it either, you should ask your ISP.

When logged in, look for anything that says "advanced", "ports", "forwarding" or "portforwarding".

When you're there, something similar to this should come up.

Note : Every router is different, but it should look similar.

[img]http://imageshack.com/a/img43/5438/n6y4.jpg[/img]

We'll only be needing TCP if we're going to use a R.A.T.

[img]http://imagizer.imageshack.us/v2/800x600q90/12/gkkn.jpg[/img]

uTorrent Method

The uTorrent method is well-known and easy to setup. I'll be showing you this, it's not hard at all. All you need is uTorrent.

Head over to "Preferences" in uTorrent's option, then to "connection" and copy these settings :

[img]http://imagizer.imageshack.us/v2/800x600q90/34/2yye.jpg[/img]

It's as easy as that, the uTorrent method. Head over to [canyouseeme.org](#) to check port 1234 (Listen to it with your R.A.T while checking!)

[img]http://imageshack.com/a/img12/356/gkkn.jpg[/img]

VPN Method

This isn't hard or anything, but there may be members who don't know what to do, and will PM the busy owners on how to do it, just to spare them some time I'll demonstrate this too, I'll be using Cryptic's VPN for this, I've seen 143VPN and it's almost the same, just web-based if I'm correct.

[img]http://imagizer.imageshack.us/v2/800x600q90/812/jgqx.png[/img]

It's really easy, head over to "settings", fill in the server you want, fill in port 1234 and it's done.

[img]http://imageshack.com/a/img12/356/gkkn.jpg[/img]

Port-forwarding with a tool

I haven't seen this method anywhere on HF, it's a method I found when I was building a minecraft server a couple of years ago. It doesn't work for everyone, but it's worth a try.

We'll be working with a tool called "Simple Port Forwarding"

Download : <http://www.simpleportforwarding.com/download>

When you've installed it, read my steps and apply them.

Close the "check list" if it opens.

Copy these :

[img]http://imagizer.imageshack.us/v2/800x600q90/607/9h08.jpg[/img]

Now right-click on the white space and press Add New, then Add Custom, and copy these :

[img]http://imagizer.imageshack.us/v2/800x600q90/17/3yv2.jpg[/img]

Press "Add"

Now press "Update Router"

If it did succeed, you will get this :

[img]http://imagizer.imageshack.us/v2/800x600q90/855/niui.jpg[/img]

If it gives a error, or it succeeds and says the port isn't open. then this method won't work, I've experienced it at a friend's PC.

[img]http://imageshack.com/a/img12/356/gkkn.jpg[/img]

I hope this helped you, Thank you for reading my tutorial.

yawaka - January 19, 2014, 7:00 am

well done thanks for this wonderful tut i approve!

we33456y5 - January 19, 2014, 7:05 am

I am glad you made this thread maybe this will cut down on portforwarding threads.

cyberducky - January 19, 2014, 7:28 am

Very high quality and well written tutorial! Good job! ?

King Cin - January 19, 2014, 9:13 am

Thanks for all the support, it should help some members with port-forwarding.

Theref - January 19, 2014, 10:01 am

Never knew that simple port forwarding tools ? well though my port already forwarded, this sure will be handy in the future.

King Cin - January 20, 2014, 2:01 pm

I found it once when I ran a minecraft server. It's only useful if you can't buy a VPN and if the other methods won't work.

bssbig - January 20, 2014, 2:08 pm

very well done tut, i have done it with all three methods except the last simple port forward method. It is gong to be helpful for many others!

King Cin - January 24, 2014, 2:58 pm

Thanks, I hope it does help other members, since this section is getting spammed with "Can't port-forward" or "I need a R.A.T that doesn't require port-forwarding"

Precisio? - January 27, 2014, 12:00 pm

Nice tutorial, should be in tutorial section.

Added it to my RAT HelpDesk.

-GUMI

Thanks this helped a whole lot...

Thumbs up

King Cin - February 11, 2014, 11:32 pm

Getting this thread back up, should help some users.

Leave comments so the thread stays alive and so I know what to change please.

rohankilzero - February 20, 2014, 11:58 pm

thank you it is very helpful for beginner like me thank you so much.

layzie0099 - March 10, 2014, 8:58 pm

Hello Everyone, does anyone here knows how to port forward this router.... it is called L7 Networks L7-NR-2000 router

Lord_ - March 10, 2014, 10:56 pm

I just use nVPN and it has free portforwarding and it is lovely

Mokum - March 30, 2014, 3:21 am

Thanks for this tutorial!

But i still cant get any port open...

Is there someone that can help me with this?

greenwalt - March 30, 2014, 3:36 am

Bookmarked for future reference. Thank you.

skywalker16 - March 31, 2014, 7:49 pm

thanks for sharing this. it is helpfull. :)

JakeFromStateFarm - April 2, 2014, 7:08 pm

omfg Thank you so much I love you. [No homo]

TheRealSlimShady - August 10, 2014, 9:06 pm

this helped me a lot, thanks so much :)

sunstrife - August 10, 2014, 9:27 pm

thanks you for the tutorials its very nice

Royal ! - August 11, 2014, 12:55 pm

Nice thread, OP. This will surely help users who need to porforward for something.

hello1234556 - August 18, 2018, 7:59 pm

i need help would you be able to help me thanks
