Thread: [Mainstream Skype Resolvers down, Need another one](#)

PROTONIX - January 19, 2014, 1:24 pm

Hey guys, it seems that almost every resolver is down. If anyone knows why please reply here. If someone knows a fully functioning skype resolver please reply here. I am trying to test a stresser that i have recently purchased today :) Thanks! :D

Komodo - January 19, 2014, 1:26 pm

Most Stressers have a built in Skype Resolver. Skype Resolvers do not get the IP if they are offline or using a Proxy.

Jagster™ - January 19, 2014, 1:29 pm

Use Wireshark to get the Ip via Skype, its much more efficient, it will give you the REAL-Time IP, and not the "last logged in" IP, which is useless in many cases. Call your victim in skype and look in WlreShark for the Packets.

Apply the Filter below in WireSHark while calling your victim:

Code ip.src == (YOUR IPv4 Address) and tcp.port == (YOUR PORT || udp.port == (YOUR PORT)

Well i do know how to get IP addresses through VPNs and Proxys no problem but i think the API servers for the skype resolvers are currently down :/

Komodo - January 19, 2014, 1:31 pm

Not every Skype Server API would end up going down at the same time. It is either a connection Issue or they have a Proxy, and or are Offline.

PROTONIX - January 19, 2014, 1:32 pm

<http://www.resolve.me.org/> API servers are down.

(Jan 19, 2014 02:29 PM)Jagster Wrote: [\[CITE\]](#) Use Wireshark to get the Ip via Skype, its much more efficient, it will give you the REAL-Time IP, and not the "last logged in" IP, which is useless in many cases. Call your victim in skype and look in WlreShark for the Packets.

I have wireshark but i am lazy to ring the person lol

Komodo - January 19, 2014, 1:33 pm

For only one site then? Try a different one. Or get a Booter with a Skype Resolver included.

Jagster™ - January 19, 2014, 1:33 pm

Well then if you don't want to work for it don't expect users to help you. ?

PROTONIX - January 19, 2014, 1:33 pm

The booter i use has one but it runs of Resolveme.org so i am basically in the use right now for Wireshark :/

PROTONIX - January 19, 2014, 1:34 pm

Lol i know but resolvers are just easier in a way were you don't have to do much. I tried scavenging for other resolvers looking via Google but they all don't work :/

Komodo - January 19, 2014, 1:35 pm

Sorry you bought a Booter without a working Skype Resolver. Goodluck.

PROTONIX - January 19, 2014, 1:37 pm

(Jan 19, 2014 02:35 PM)Komodo Wrote: [\[CITE\]](#) Sorry you bought a Booter without a working Skype Resolver. Goodluck.

Stresser hits 20GBPS. Problem is that resolveme is down which means it effects the resolver on the website soo yeah... lol

Jagster™ - January 19, 2014, 1:38 pm

All this time you spent "scavenging" for a 'working' resolver, you could have had your victims IP 5x already. Just saying.

PROTONIX - January 19, 2014, 1:39 pm

<http://skypegrab.com/skype-beta>

I found one :)

Ahh it took me 1 minute for scavenging so i didn't waste much time :)

xD well the truth is im a very lazy person when it comes to snatching a IP

Slouchs - January 19, 2014, 3:13 pm

this skype resolver has worked really well for me, try it out

<http://byleco.xaa.pl/skype/>

Dr.Rockzo - January 19, 2014, 3:57 pm

<http://www.varosion.com/resolver.php> = The best skype resolver but lately it hasn't worked as well...

Dutixi - January 19, 2014, 5:03 pm

resolveme.org this one usually works, and has locations and stuff.

smuddrickk - January 19, 2014, 9:08 pm

<http://www.iskypesolve.com> . It's always up.

Frankstare - January 19, 2014, 9:19 pm

you sure?

<http://mostwantedhf.info/> is up

<http://resolveme.org/> is up

<http://www.#.net/resolver/skype.php> is up

Q717 - January 20, 2014, 8:48 am

Google is your friend :)

Good luck

Good luck

I've been using Google at the start. Never post that anywhere again -_-

spappe - January 29, 2014, 10:03 am

I'm looking for a resolver too, could someone tell me one that works well?

Spappe

PROTONIX - January 29, 2014, 1:18 pm

Resolveme.org

Works mint! Always use it instead of using a sniffer. :P
