Thread: [Launch Minecraft 1.7.4 from CMD Launching Minecraft 1.7.4 in VB.Net \(DEAD THREAD DECI](#)

kronoscloud - January 19, 2014, 2:27 pm

Decided to keep private from skids!

W R T - January 19, 2014, 2:34 pm

Couldn't you just type "start minecraft.exe" into the CMD?

Typing "start minecraft.exe" would only launch the Official Minecraft Launcher.

This allows the user to control certain parameters, and is also the basis for creating a custom Launcher client.

Like the example I have in my OP. I am able to log people in to minecraft without them ever knowing the password or having to type anything in it's a simple button click.

Ahhh now that you explained it a little more in depth, this is actually very cool. Nice work OP.
