I hope this SEO package is not just simple backlink posting. SEO is a difficult skill to master, so good luck with your service!

Nope. Nothing blackhat here. Tibit is the boss at this, and he does not spam backlinks or use any social signals.

It's not backlink spamming. People who use that method hurt companies rather than help.

This is 100% search engine safe. We've mainly focuses on brick and mortar businesses (companies with a physical location that rely on people going to their stores for sales mainly). Our methods are extremely effective for local SEO, but also pretty good for online businesses as well.

I can vouch both for Tibit and Mad. They are currently working on a site I gave them and I will post back with results.

I have also bought earlier Empire products. Definitely a good buy.
