Thread: [Error while installing vBulletin](#)

ZuGgY - January 19, 2014, 6:03 pm

So I'm trying to install vB 4.2.1 on localhost using WAMP and I get the following error:

Code Database error in vBulletin :

mysql_connect() [[function.mysql-connect](#)]: Access denied for user 'user'@'localhost' (using password: YES)
C:\wamp\www\forum\includes\class_core.php on line 317

MySQL Error :
Error Number :
Request Date : Monday, January 20th 2014 @ 01:56:13 AM
Error Date : Monday, January 20th 2014 @ 01:56:13 AM
Script : http://localhost/forum/install/
Referrer :
IP Address : 127.0.0.1
Username :
Classname : vB_Database
MySQL Version :
How the heck do I fix this?

Thanks ?

"user" simply doesn't have permission.

Make sure you're using the right username and password, and that the user has all privileges in the MySQL database.

Fucking hell, edit button is too small so you get another reply

I'm so fucking stupid, thanks again man, fixed the problem, for some reason the user had host on any host instead of local and that seemed to do the trick
