What code? Just first allow the app indicated on the page then click the 2nd link on the instructions and copy the url and paste in the textbox for access token.

For post id, get the status link and the numbers on the address bar is your post id.

You need both postid and commentid to make it work. Check the link to get the comment. Make sure you click the timestamp of the comment to get the link with comment id.

Make sure you input both postid and comment id. I just tried it and it worked. The likes are few because the tokens are expiring, it'll get more later, once the users re-entered their tokens again.

yes I inputted the post ID and Comment ID but It does not work :(

I posted a comment on a fan page. Is the comment like working on fan pages? and one more question. is there a time interval using this? I mean every 10 mins, 30 or 1 account per day something like that.

Update:

In some fan pages its not working.

Proof that it is working <https://gyazo.com/5595c44144dd4ec346a528856a3d5fa6>

There's no time interval. But probably you can wait 1-2 mins. Make sure the fan page post is set on public, unless it won't work.

Btw, currently under maintenance, transferring hosts again.

You can use it as many times as you want, but different statuses. And it depends on the active users of the autoliker, because tokens expires when people logout their account or change their passwords.

I see, so the first time i use it on one status is the last time i use it? i cant get more likes after that on that one status? D: i remember when there was a few auto likers out and you could use 3 different ones and stack up likes on one status :(

You can use it again on the same status, if the users or available likes increased from before you used it.

can i get the code. thanks in advance.

SyncX - April 1, 2014, 8:35 pm

Still working perfectly. ;)

@Henixzer, not available to users anymore sorry.

sevenjah - April 13, 2014, 4:40 am

is there a problem on the minionlikes autoliker now? Last night it was working now I don't know because the available "LIKES: 0"

Namelix™ - April 13, 2014, 5:48 am

nice sharing. might be using it in future.

SyncX - April 16, 2014, 10:05 am

This kind of time there are tons of likes. Enjoy!
