Thread: [~ The Traffic Junkies | Real traffic from reliable ads companies! ~](#)

Johnny Ramone - January 20, 2014, 7:59 pm

The Traffic Junkies is an ad-based traffic network. We provide traffic for any website, CPA/PPD recommended.

I don't ask any questions; nor do I never share any information. All content (aside from child porn) is allowed. My traffic is ALL real humans, and the traffic can be specified to a certain location. We tailor each individual purchase (traffic can be optimized for adult content, certain niches, et cetera).

Pricing:

50,000 *humans hits* = \$50

125,000 *humans hits* = \$70

250,000 *humans hits* = \$100

500,000 *humans hits* = \$250

1,000,000 *human hits* = \$450

1,500,000 *human hits* = \$600

PM for larger orders

First 3 purchases of 500k+ get \$50 off!

Payment Methods:

-Currently I accept BTC, LTC, and BTC-e vouchers (we plan to implement PayPal soon).

What You Get:

-Optionally, you may receive a minimum of 60% of traffic from a specific country for no extra charge. If you want 95% traffic from a selected country, it will cost 10% extra.

-It will take a maximum of 1 week for all the traffic to be delivered. Simply tell me if you want to spread it out over a longer period of time.

-Each "hit" is unique and optimized for your niche.

-The traffic is obtained legally through various ad networks - no iFrame.

-Exploit Packs are allowed, but the plan will be custom (and most likely a little cheaper), and it will take longer to setup.

Contact:

- HackForums PM is the only way to contact me. I do not deal outside of HF (:

Am I Legit?

Since this service is completely new as of 1/20/2014, it is inevitable for users to question the legitimacy of T.T.J. As seen in my reputation and profile, I have been on HF since late 2011, and have experience selling a variety of services with satisfied customers. I'm looking forward for to dealing with customers in a professional manner.. so kiddies of HF, stay away (:

Note:

We are not associated with trafficjunky.net. I am not responsible for website errors or misconfigurations on YOUR side. I will not start the traffic until you say so.

BLACKerry - January 20, 2014, 8:29 pm

Date of reg,and rep means nothing here .
Are you willing to provide some cheaper pack ?

Regulator - January 20, 2014, 11:13 pm

Can this be used for exploit kits? I see you said anything is allowed, I am just making sure.

That is true I suppose. I'm sure I'll get some legitimate testimonials once people start buying.

And no. I spent a lot of money on setting this up / testing it. I want serious business ?

(Jan 21, 2014 12:13 AM)Regulator Wrote: [\[CITE\]](#) Can this be used for exploit kits? I see you said anything is allowed, I am just making sure.

An exploit kit would be different. I obviously can't get traffic from the big ad-networks that I use, so it may take a few days for me to set it up, but it's definitely possible for us to work something out if you're serious about this.

LoweredLifestyle - January 25, 2014, 11:09 am

damn really expensive, any cheaper offers that I could possibly afford?

Johnny Ramone - January 25, 2014, 11:09 am

Update: I added 3 new affordable plans starting from \$50!

zekar - January 25, 2014, 11:14 am

1.5m ?....

i assume u have botnet with 1.5m slaves lol or a high visited site O_O

Johnny Ramone - January 25, 2014, 11:28 am

I do not use a botnet for this service. I explained the source on the thread. And yes, I will be able to provide 1.5m hits to a legitimate buyer for only \$600. ^-^

Cakeb\$\$s - January 25, 2014, 11:36 am

As most people will probably be buying traffic for exploit packs or drivebys from you would it be possible to get some statistics on load rate?

If you don't have it i can take a small amount of traffic and give the load rate. If it's good it will be great advertising for your service.

Johnny Ramone - January 25, 2014, 2:48 pm

I'll look into that. It's definitely a good idea.

Johnny Ramone - January 28, 2014, 1:27 pm

I can now give traffic for exploit kits and JDBs for regular prices and have the order prepared within a day. PM me for purchases.
