Thread: [How to make an Animated Banner \[Server Advertisement Banners\]](#)

Maulish One - January 21, 2014, 3:37 pm

I figured I'd get back into making tutorials, I'll start with beginner tutorials once again and then work up towards the intermediate then advanced.

Here's a simple video on how to make animated and fading texts for your private server(s) such as Runescape Private Servers, WoW Servers, Mine Craft servers, etc.

http://www.youtube.com/watch?v=hlZIPGO_ZYs

Amazing tutorial! Would it be any different if I wanted to add items? (I.e. Minecraft sword)

Also can you share your styles list if you don't mind?

[img]http://i402.photobucket.com/albums/pp101/carulez1/FEpVP-Banner1-1.gif[/img]

My attempt?

My attempt?

It all depends on what sort of effect you're trying to do with the items. In this case fading, no. It'll have the same outcome as it would with a text.

You should make a different tutorial with other effects :D

I plan to, I'll probably teach some other cool effects you could do with the timeline. I have work today and tomorrow so I'll see what I can do.

No problem man, enjoy. Make use of it and show me some designs you come upon while using this

tutorial.

adrianacs35 - February 1, 2014, 5:58 am

Thanks, this thing really helped me out....

????? - February 2, 2014, 12:19 pm

thanks alot for this it helped alot very helpful

Roddan - February 9, 2014, 1:40 pm

thanks! will be useful for my CS 1.6 community !

etafo - February 11, 2014, 7:47 pm

This is a Perfect Tutorial, it will be really helpful to me Personally . Thanx Mate

No problem man, glad you enjoyed watching and using it.

CANDYFAM - February 12, 2014, 12:39 pm

Great tutorial , helped me a ton .

Easy to follow and read :):)

A+++

Appreciate it. I made a thread on asking which tutorials people would like to see. I'd like to get some replies so I can make the tuts.
