AJMxD - January 22, 2014, 3:14 am

Hello, I need a new logo for my social blog. I use the logo on my website and also for watermarks on pictures, It has to be related to my content and there is. If you are interested in being paid \$20 or more for a good design then read below :)

To save time and everything this is how its going to work. The logo I currently use is posted below. Its "JustBlazeIG" so please have the text involved in the logo :) Now make the design and put your own water mark over it and post it here or PM it me and well if I like it I'll buy it simple. I aint doing none of that shitty paying before. This is the real world people!!!

Pretty big image, and I dunno what that is underneath it :s must of fucked up when uploading :)
