Nope, I actually just use Gimp 2.8, ha ha. Hey! It gets the job done, and I've seen people actually make decent stuff with it. I know if they can do it I for-sure can.

Ehh sure? :P

Font: Doesn't really matter, make it happy :D

Pictures: Some bubble's and some happy brushes.

Colors: Blue, Red, Purple, everything a little bit light.

Design: Bubble's

I'm not really in the need of a signature, so I have no idea what to put here but though... Why not give it a try? :D

It's your party man, make something happy. Because I don't like dark.
