Thread: [\[Userscript\] Tab with forums of your choice | Favorite forums tab \[Updated: 31/07/15\]](#)

**The-One** - January 22, 2014, 4:35 pm

Hey,

I've just made this userscript which adds a new tab into HF. In this tab you can add sub-forums of HF by clicking the star in front of its name (see picture), it will automatically add the forum to the Favorite tab using jQuery.

Images:

Spoiler [\(Click to View\)](#)

Favorizing (grammar?) stars:

Example of a favorite tab:

Drag and drop (1.0.7):

Preview subforums:

Features: Add forums by starring them

Stars in Favorite tab forums are linked to their original forum

Sort your favorite forums by dragging the forum-title (see picture) to another forum

Uses jQuery to add/remove/sort tabs, thus no reloading needed anymore

Information: Only tested on Chrome/Firefox

Works on all 3 HF themes

Download (version 1.1.1) / Last updated (05/08/2015):

<http://pastebin.com/raw.php?i=f3iapKX3>

Changelog:

Spoiler [\(Click to View\)](#)

Code [-] 1.1.1

- \* Changed script to adapt to the new HF forum mapping

- \* Changed star links from imgur links to base64 encoded image for faster loading times

[-] 1.1.0

- \* Fixes

[-] 1.0.9

- \* Small bugs fixed that occurred because of small theme changes

- \* Once again, replaced stars URL. Now uploaded one myself

[-] 1.0.8

- \* Replaced stars URL as Omniscient has removed the old theme (which stars this userscript was using)

[~] 1.0.7

- \* Adding / removing tabs (by starring) is now done with jQuery, so there is no need to reload the page anymore in order to view them
- \* Redone identification of certain elements
- \* Drag 'n Drop support added, you can drag a forum title into another forums' cell and it will re-add itself right after the cell

[~] 1.0.6

- \* The injected tab now acts more as a 'forum-tab', it doesn't lose focus on page reload anymore
- \* General Topics is the default tab when visiting the forum, its now being replaced by the Favorite tab
- \* Added jQuery for loading content faster after DOMContentLoaded is fired + working on dynamically loading forums

[~] 1.0.5

- \* Saving settings now works under all HackForums urls (http / www / . / - hackforums.net)
- \* Fixed that the star click events would disappear after clicking them once

[~] 1.0.3

- \* Public release

Please post your thoughts and bugs you find,

The-One

+mK - January 22, 2014, 8:36 pm

I like the concept of it, great share!

It probably wouldn't bother the regular user of this script, but would it be possible for you to create a GUI similar to something like [\[Userscript\] Design Customizer - Customize the look of HF!](#) by [1n9i9c7om](#)? I'm a complete fan of using a Userscript that is VERY useful, yet I don't know if it is actually running until I don't have it, you know? Like, I hate seeing the stars next to the sections. 8| For the GUI, perhaps you can add a checkbox next to each section and sub-section of Hack Forums. It might be a bitch to add, as well as a long list, but like I said, it'll clean everything up.

Thanks for creating this script, it's pretty sweet, I must say.

Thanks for your reply, I'll appreciate it. I will look into it asap, I have to get to work in 10 minutes so I can't really give you a decent answer now. I'll check back tonight.

Snoweyes - January 24, 2014, 5:13 am

Awesome! great work of you man appreciate this ?

Rayyy - January 24, 2014, 6:12 am

This is undoubtedly a really nice script. Thanks for creating this script!

**Javis** - January 24, 2014, 6:29 am

Awesome idea! Installing it now :D Thanks!

EDIT: Been using it for a few hours and loving it. Thanks again!

**SIM-1073426** - January 24, 2014, 6:36 am

This is pretty neat. I just sent it to a couple people.

**JayPrey** - January 24, 2014, 7:03 am

Wow, this looks really nice. When i get home ill try to use it. I use firefox so hopefully it will work.

**The-One** - January 24, 2014, 8:25 am

Hoping to get a response from you whether it works or not :)

Will be updating it tonight, currently implementing jQuery-based functions.

**?Alexander** - January 24, 2014, 9:01 am

I'm using this right now. Looks neat, I don't have to switch tabs now!

**The-One** - January 25, 2014, 8:08 am

(Jan 24, 2014 10:01 AM)Asa Butterfield Wrote: [\[CITE\]](#) I'm using this right now. Looks neat, I don't have to switch tabs now!

Awesome, thanks for the feedback. Are you using Firefox by any chance?

Also, updated to 1.0.7. See changes spoiler for further details.

**?Alexander** - January 25, 2014, 8:12 am

Yes, I'm using it with Firefox. Works like a charm, haven't found any problems.

**Blink** - January 25, 2014, 8:24 am

Just installed this, it's amazing! Simple yet very effective.

As a suggestion, could you make it so you can hide the stars? Cause now that I've got my favourite forums starred, I don't really need them anymore so they're only in my way :P

**Shanks** - January 25, 2014, 9:08 am

That is a Great script, Will download later.

Good job!

**The-One** - January 25, 2014, 10:27 am

Okay, I might add it. Should it hide the stars on the Favorite tab too?

(Jan 25, 2014 09:12 AM)Asa Butterfield Wrote: [\[CITE\]](#) Yes, I'm using it with Firefox. Works like a charm, haven't found any problems.

Thanks for the feedback. Did you already try the latest one?

**Knar.** - January 25, 2014, 10:33 am

You should add support for sub-forums, would make it much better. Otherwise I love it, nice job!

**The-One** - January 25, 2014, 1:05 pm

(Jan 25, 2014 11:33 AM)Knar. Wrote: [\[CITE\]](#) You should add support for sub-forums, would make it much better. Otherwise I love it, nice job!

I might do that, but that would require me to recode most parts as its based on subforums and not subsubforums. I'll see what I can do!

**Knar.** - January 25, 2014, 2:07 pm

(Jan 25, 2014 02:05 PM)The-One Wrote: [\[CITE\]](#) I might do that, but that would require me to recode most parts as its based on subforums and not subsubforums. I'll see what I can do!

That would be awesome! Good job on this.

(Jan 25, 2014 03:07 PM)Knar. Wrote: [\[CITE\]](#) That would be awesome! Good job on this.

I might look into it next weekend, as I currently have to work allot.

Thanks for the suggestion anyhow :)

**Snoweyes** - January 27, 2014, 10:08 am

I've seen you have updated it and it is working even better now, good job!

**?Alexander** - January 27, 2014, 10:08 am

I'm going to try out the newer version on Firefox.

Edit: shit looks smooth. All working for Firefox.

**The-One** - January 27, 2014, 12:17 pm

(Jan 27, 2014 11:08 AM)Asa Butterfield Wrote: [\[CITE\]](#) I'm going to try out the newer version on Firefox.

Thanks for the feedback. I guess, I can safely say now that its working stable on Firefox.

**King of Clubs** - January 27, 2014, 4:23 pm

Wow. this is so awesome. I'm gonna use this now and forever!

This is wrong section by the way

**The-One** - January 28, 2014, 1:03 am

I had the thread moved from the webbrowser section to the lounge in order to get more feedback on it when I released it.

(Jan 27, 2014 05:20 PM)xadamxk Wrote: [\[CITE\]](#) And please continue to add future scripts to my: [Ultimate Compilation of Hack Forum Userscripts](#)

I've already posted this one in your thread :)

**Eternal.** - January 28, 2014, 1:10 am

Now this is really damn cool, thank you!

**'Snorlax** - February 4, 2014, 1:59 am

Nice script you got here! It would be awesome if you could add it for subsections as well, so you can add sections like the Deal Dispute section.

Oh.. and do a toggle on those stars. It is annoying to look at after you have added them :P

**The-One** - February 4, 2014, 8:03 am

(Feb 4, 2014 02:59 AM)Snorlax Wrote: [\[CITE\]](#) Nice script you got here! It would be awesome if you could add it for subsections as well, so you can add sections like the Deal Dispute section.

Thanks, glad you like it! I've already added implementing sub-sections to my todo list.

(Feb 4, 2014 02:59 AM)Snorlax Wrote: [\[CITE\]](#) Oh.. and do a toggle on those stars. It is annoying to look at after you have added them :P

You mean removing them from the favorite tab?

**'Snorlax** - February 5, 2014, 6:32 am

(Feb 4, 2014 09:03 AM)The-One Wrote: [\[CITE\]](#) You mean removing them from the favorite tab?

No I mean you should add a button so you can toggle the stars. When you toggle the stars they will show, then you toggle again (or refresh page) and they will be gone.

It is annoying to look at the stars when I have made my selection of sections ;)

**The-One** - May 5, 2014, 5:04 am

Updated this script, replaced the star URL as Omniscient removed the images of the old theme.

**Cyber Saint** - May 16, 2014, 8:37 pm

Looks like a very useful userscript in my eyes judging from the screenshot. Userscripts.org has been down for quite a while now so I'm sadly not able to install this right now but I surely will when possible. Good work.

**?Alexander** - July 20, 2014, 3:03 pm

I'm still using this userscript. Best one I've downloaded so far. I want to give everybody the opportunity to see this great userscript! ?

**xploD** - July 21, 2014, 12:03 am

What an awesome script you have made here! Can't wait to get it going :) Thanks man!

Quote:This website is under heavy load

We're sorry, too many people are accessing this website at the same time. We're working on this problem. Please try again later.

Sadface:(

**cyberducky** - July 22, 2014, 9:45 pm

I use this userscript as well, but why aren't the stars showing anymore?

**Ombra** - July 28, 2014, 12:29 pm

I can't reach the download link and i'm unable to understand why...

**The-One** - July 29, 2014, 11:24 am

(Jul 28, 2014 12:29 PM)Ombra Wrote: [\[CITE\]](#) I can't reach the download link and i'm unable to understand why...

Userscripts.org was taken down by its administrators. I'll upload it on Pastebin and change the link.

**Cyrus** - August 22, 2014, 9:13 pm

I'ma check this out, thank you for this! ?

**The-One** - August 23, 2014, 6:09 am

(Aug 22, 2014 09:13 PM)Cyrus Wrote: [\[CITE\]](#) I'ma check this out, thank you for this! ?  
Replied on your PM, if you need any more help feel free to PM me :)

**Machiaveli** - August 23, 2014, 6:38 am

Really neat userscript.  
Thanks for sharing!

**Cyrus** - August 23, 2014, 7:45 am

Really nice userscript, thank you! ?

**The-One** - September 15, 2014, 11:29 am

I've been getting PMs about userscripts-mirror, so I've added the link. Enjoy!

**The-One** - January 3, 2015, 7:28 am

Updated this, for if anyone is still interested in this!

**Oak** - January 3, 2015, 6:17 pm

So with all the scandal about antonn's HF Manager userscript, I'm going to start needing some peeps to check out whether these are safe or not.

I'd love to use this one, however, and not that I don't trust OP but now I'm suspicious of all new userscripts.

**Oak** - January 3, 2015, 6:28 pm

(Jan 3, 2015 07:25 PM)xadamxk Wrote: [\[CITE\]](#) Most userscripts are easy to check, but extensions are sketchy.

I only use the ones my Xerotic, Emy, or my hoe Snorlax.  
Then go make a copy of this one or force one of them to ?

**The-One** - January 5, 2015, 2:22 am

(Jan 3, 2015 07:17 PM)Sir Wrote: [\[CITE\]](#) So with all the scandal about antonn's HF Manager userscript, I'm going to start needing some peeps to check out whether these are safe or not.

Feel free to check this out, the code is open to read for everyone.

Also, if you know someone with basic HTML/Javascript understanding they can tell you this is safe to use.

**Server97** - January 5, 2015, 11:35 am

oh wow. what a useful and amazing realise. this is awesome

**Aura** - January 5, 2015, 5:17 pm

Isn't Omni working on a tab like this for HackForums? I think he liked your idea and decided to implement it. Can't remember where I read that.

**The-One** - January 6, 2015, 12:24 am

(Jan 5, 2015 06:17 PM)Aur? Wrote: [\[CITE\]](#) Isn't Omni working on a tab like this for HackForums? I think he liked your idea and decided to implement it. Can't remember where I read that.

I've never saw a post of Omni where he said that (tho I probably missed alot posts), but if he actually does implement it, than that would be pretty cool ^^

**The-One** - March 19, 2015, 11:10 am

Not sure if people are still using this, but if so I've released a new version with some various fixes.

**Datageni** - April 13, 2015, 11:24 am

I'm surely going to use this, I didn't know about this userscript until now.

**The-One** - April 13, 2015, 12:11 pm

(Apr 13, 2015 11:24 AM)Psykotikum Wrote: [\[CITE\]](#) I'm surely going to use this, I didn't know about this userscript until now.

Awesome! Let me know how it works out ?.

**heritage.** - April 13, 2015, 2:41 pm

Not sure if it's been posted but, is there anyway to favourite subforums?

**The-One** - April 14, 2015, 1:39 am

(Apr 13, 2015 02:41 PM)Lie? Wrote: [\[CITE\]](#) Not sure if it's been posted but, is there anyway to favourite subforums?

It was suggested before, although I didn't have any time for it back then. I can look at it when I have more time..

**The-One** - July 31, 2015, 12:56 pm

Updated, added some small fixes. And yes, this is still working.

**Roger Waters** - August 4, 2015, 6:14 pm

Can you update this to fix this? It's been like that for a few weeks now, due to changes with the site design.

**The-One** - August 5, 2015, 5:06 am

(Aug 4, 2015 06:14 PM)Roger Waters Wrote: [\[CITE\]](#)

Sure thing, uploading fix in a few minutes.

Uploaded new version, see changelog for details.

Roger is an awesome musician btw. ?

**Cyrus** - November 6, 2016, 5:41 pm

Still a great script, thanks buddy! ?

**necr0dr** - November 7, 2016, 3:33 pm

Great stuff, very handy thanks!

**SIM-1676753** - November 7, 2016, 9:17 pm

Wish I could code shit like this.. :c

**?????** - November 8, 2016, 11:08 am

This is a noob question but I'm not familiar with these types of scripts, how do you add a script like this to your browser? (I have Firefox)

**The-One** - November 9, 2016, 11:32 am

(Nov 8, 2016 12:08 PM)Gryff Wrote: [\[CITE\]](#) This is a noob question but I'm not familiar with these types of scripts, how do you add a script like this to your browser? (I have Firefox)

You will need Greasemonkey to be able to run the script!

<https://addons.mozilla.org/en/firefox/addon/greasemonkey/>

(Nov 7, 2016 10:17 PM)Virility Wrote: [\[CITE\]](#) Wish I could code shit like this.. :c

This script is actually pretty simple (and messy!). You should check the code out if you want. Feel free to ask anything that is unclear to you.

???? - November 10, 2016, 9:32 am

Thanks!

The script works perfectly, really happy with this.

Just a question, is there a way to toggle the buttons for adding forums to your favorites? I've already added all the forums I regularly visit and I'm not entirely happy with the look of them. If not, this may be something interesting for you to add.

The-One - November 27, 2016, 6:08 am

The option is currently not there, but it shouldn't be too hard to implement.. let me know.

Ombra - April 23, 2017, 9:51 am

This userscript looks great, but to me it would be even better if there was a page containing all new threads, taken from forums that have been marked as favorite.

HFES had that feature and it was beautiful.

Stone.Cold - May 28, 2017, 12:34 pm

nice release. I'll check this out later.
