Thread: [Useful trick Host files on facebook \[TUT\]](#)

neil5050 - January 23, 2014, 9:23 am

Do not ask me why is this useful.

instructions

First -> create a facebook group and set it as public

Exampleurl that I created:

<https://www.facebook.com/665681943484084>

OK i clicked your link it is Direct Download... Thats pertty cool.

I dont use facebook much but i can kind a use for this :)

Can you only upload .jpg or can you do .exe (I feel like facebook wouldnt allow that)

I dont want my real friends to see what I post... So will this work on a fresh profile If i make one ?

Thanks

I only tested image and text files.
upload limit is 25mb. So you might be able to.
and yes this will work on a fresh profile you make
