@dexter

I clicked my link

https://www.facebook.com/Okletsdothiscauseneiliscool/posts/332975513500803?stream_ref=10 ->

if you do click that it will take u to google.com

But if you go to my fb page I created there and view the post, the same link posted above shouldn't have changed. Its only viewing the post directly do you see google.com (due to facebook's updates)

I made some website who pretend to be a JPG image, but this logout URL is loaded in the background :3

<http://www.capsload.it/images/1437649301.jpg>

Just send this URL to your friends and their account gets logged out :-)

Can you make it inside of the Note, like this code

Code `//www.facebook.com/dialog/share?app_id=184484190795`

`&display=popup`

`&e2e={}`

`&href=URL_OF_THE_NOTE_HERE`

`&locale=en_GB`

`&next=www.facebook.comThread`

`hackforums.net/showthread.php?tid=4381769&highlight=Mass+Logout`

if people visit my facebook, they will get instantly log out.

I think you can't cuzz facebook patched it.
