Thread: [So I just switched from VS express 2010 to VS 2013](#)

NOAH - January 23, 2014, 3:24 pm

This looks so much different!!

I like how it comes with more templates than before.

Anyway is there any concerns I should have towards this?

Thank you.

Idk..? Errors with adding old projects or something? xD

Everything seems to be nice just looks better.

2012 and 2013 were built for supporting older projects. If you have 2013, "Update 1" just got released recently (a day or so ago) too FYI.

Still rocking the old Visual C# 2010 Express edition. I do have 2012 ultimate but I really do not like or need it.

Good luck with the change, I'll be sitting here :3

I've got VS 2013 Pro (Free download because of a course I'm taking through University) And I gotta say, I do love it! Looks very nice and although I have little experience with C# it is making learning it a lot of fun. I got used to it very easily compared to other IDE's like Eclipse when I was learning Java.
