I heard No-IP was not good at all. So is there any other one?

What are some good methods to make money with slaves?

What is the reverse proxy used for?

Thanks in advance.

whyso - May 10, 2014, 12:01 pm

<http://dyn.com/dns/> is another DNS one..

Mining is a good way to make money.

umm donno about it sorry..

Use a crypter to crypt the server.... so that when you spread. & slaves get infected & their AV's Does not detects....

I already asked this question on other help desks but anyways I want to know what you think.

How big are the chances to getting caught? How do actually people get caught doing this stuff?

And what are the consequences? How much jailtime can you get?

Use VPN for cover your ass so when you get caught cops cant trace you.

Dont do suspicious things when you play with slaves... slaves might get suspicious & might even call the cops.

If you get caught... you will go for the jail for a long time depends on the regional law. or the country law... as your invading someones privacy for that every state there is a big punishments for that.

So COVER YOUR ASS!!
