This method is greyhat and immoral. Asking for a refund must mean that you actually applied the method, proof must be shown.

(Feb 21, 2014 02:07 PM)slybathaxorfg Wrote: [\[CITE\]](#) Originality - 7.5/10

The method is has been around for a while.. Quite a while actually. It can be called scamming, but it is more like setting a friend up on a blind date with a chick who has sexy ass pics online but is a mix between Satan, Honey Boo Boo, and that homeless bitch down the block. Simply put the more HQ you make your listing sound the higher chances of you scoring big. Anyways it's a method that though is used very often this unique twist HLS has added to it makes this a lot simpler and effective.

Design and Organization of Ebook - 6/10

Honestly, though HLS is pretty cool, I can't lie - being a grammar Nazi and all. Sigh At first look it

is exactly what you see. One very poor looking mass of words forming a paragraph. The layout over all made it hard to stay in place and to understand.

Detail and Instructions - 7.5/10

The first half... ish. can be described as dictionary (for Grade school) compared to the little detail in the rest. He does make life a hell of a lot easier by posting a link that is just- Wow!- So handy. Also, it's not that you can't figure out what to do. Just for those people, such as myself, who always need to know EVERYTHING before something makes sense, it can be kind of aggravating to try to understand something that can be (and is) common sense to most people.

Difficulty and Time required - 9/10

Finally where things are starting to look up for this method! Overall it is really easy, the hardest part being trying to figure out what to sell and how to make people want it. Of course this being based on REAL people buying something the time requirements may very depending on what is being looked at on the market right now. Making the item listing as appealing as possible will definitely decrease the wait time. Another thing I forgot to cover is the setup difficulty which without a doubt is getting that positive E-bay rep.

Overall Opinion - 8.75/10

While the file is hard to understand and look at sometimes the results do come. There is an example in there that seems like it would actually work quite well (which I'm not going to post for the same reason HLS didn't). My favorite aspect of this being you can wait until you are hopped up on drugs or having a hyper-frenzy to create as many listings as possible then just forget until you receive that email, "[Person] has just bought your [item] for \$\$[Free money amount]!"

P.S. stop asking me for vouch copies..

No that is not what happens. It isn't sending them like a coupon or book.

From a scale 1 - 10 what would be the immorality of this method?

Homeland. - February 18, 2014, 9:18 pm

I would have to say a 3 or 4. Its not blackhat, which I would say is 10 on the scale. It's a little below half.

Really interested in this method.

Do you have Skype?

Just noticed it at the bottom of the sales thread.

I've added you.

Why dont you answer questions in here?

Why pm the answers in pms?

Other people want to know too.

It also saves allot of repeating questions.

Got this method. It is VERY immoral. You CAN make money easily but I refuse to jeopardize my eBay feedback and use this method. Its bad karma, For me personally it was a waste of \$25. Im NOT trashing the method its just that I'm personally not the type of person to use it.

Originality - 7.5/10

The method is has been around for a while.. Quite a while actually. It can be called scamming, but it is more like setting a friend up on a blind date with a chick who has sexy ass pics online but is a mix between Satan, Honey Boo Boo, and that homeless bitch down the block. Simply put the more HQ you make your listing sound the higher chances of you scoring big. Anyways it's a method that though is used very often this unique twist HLS has added to it makes this a lot simpler and effective.

Design and Organization of Ebook - 6/10

Honestly, though HLS is pretty cool, I can't lie - being a grammar Nazi and all. Sigh At first look it is exactly what you see. One very poor looking mass of words forming a paragraph. The layout over all made it hard to stay in place and to understand.

Detail and Instructions - 7.5/10

The first half... ish. can be described as dictionary (for Grade school) compared to the little detail in the rest. He does make life a hell of a lot easier by posting a link that is just- Wow!- So handy. Also, it's not that you can't figure out what to do. Just for those people, such as myself, who always need to know EVERYTHING before something makes sense, it can be kind of aggravating to try to understand something that can be (and is) common sense to most people.

Difficulty and Time required - 9/10

Finally where things are starting to look up for this method! Overall it is really easy, the hardest part being trying to figure out what to sell and how to make people want it. Of course this being based on REAL people buying something the time requirements may very depending on what is being looked at on the market right now. Making the item listing as appealing as possible will definitely decrease the wait time. Another thing I forgot to cover is the setup difficulty which without a

doubt is getting that positive E-bay rep.

Overall Opinion - 8.75/10

While the file is hard to understand and look at sometimes the results do come. There is an example in there that seems like it would actually work quite well (which I'm not going to post for the same reason HLS didn't). My favorite aspect of this being you can wait until you are hopped up on drugs or having a hyper-frenzy to create as many listings as possible then just forget until you receive that email, "[Person] has just bought your [item] for \$\$[Free money amount]!"

Hello,

Anything immoral in this method?

Does this involve a misleading title like ex: fifa 14 how to get 1,000,000 coins or so?

No misleading title either. You're not selling empty boxes or anything silly like that.
