Introduction

I joined HF a couple of months ago because I was once ratted and from then on I wanted to discover the world of blackhat. Since registration I have learned so many new things I can honestly say that i'm grateful for this forum it has so many things you can discover in any category.

General Community

I'm not much of a poster but I do look through what others post and to my understanding the community is OK towards helping others achieve what they need. As for scammers there are many out there but it's always nice to be able to search a users UID and see what's been going on. It's really cool with so many active members that way minutes after a thread has been posted you can get a reply for whatever the situation is, i'm really surprised.

Staff & Administration

Omniscient - When I first purchased L33T with BTC I literally got my upgrade in like a couple of hours if not one. As the owner of the site having to handle many things i'm surprised he could actually reply to my PM's so quickly. If you really think about it without Omni there would be no HackForums and none of us would be browsing and posting on the forum and this is why we should all take a share of our earnings and donate to him because he has been through a lot of work to making HF what it is today.

Judge Dredd - I rarely see him posting but when I do, it is a quality post that benefits someone in some way.

As for the rest of the staff team I don't really have anything to say as I do not have much knowledge about them but I will definitely update the thread when necessary!

Groups

I've seen many userbars and posts from people part of a group. As for quality I would definitely say the " Illuminati " is the finest group on HF as for the other groups I couldn't give an honest opinion for them however it's nice to have them all contributing in some way!

Awards

I think it's really neat how the award system works and when you see someone with a certain award it really has value because Omniscient is really good with distributing them. I've seen the award list and it would be nice to have a couple of more awards thrown in there but overall a really nice feature of the forum.

I want to thank every member on this forum for making it what it is today. I'm sure it will prosper in the future at the pace it is going and really hope the best for us all in whatever it is!

Thanks man :) Appreciate it. And I did spend quite some time.

KingVS - January 25, 2014, 8:13 am

I didn't because I wanted too.. There is no point in spamming on my thread, reported.

EziNet - January 25, 2014, 8:19 am

You will always get quick upgrade once you pay with Bitcoin, because there is no need of any verification & Charge back!

KingVS - January 25, 2014, 9:44 am

Yeah I never knew that it's pretty neat how BTC works :)

Cathal - January 25, 2014, 9:54 am

It seems a bit early for you to be posting a feedback thread, in my opinion.

I enjoy these experiences you shared, I always enjoy reading shared experiences, not knowing if I'm just saying this because of the weed.

Kind words about Illuminati. You should be more in-depth about sections you regularly visit though.

I like your feedback thread, it's concise but I would like this to be more detailed.
