Thread: [Hello, Check it Hackers :D](#)

Crescendo - January 25, 2014, 5:59 am

Hello Guys, i'm newbie and i don't know about hacking, i want to ask if is there any way to log in there?, without ANY access RIGHT thats mean (i'm normal member of the forum - and i want to know if can find-hack the username/pwd), Thanks :D

vr4nonymous - January 25, 2014, 6:03 am

wp is most secure

brute it force with hydra and word collection

Crescendo - January 25, 2014, 6:04 am

basically i want just to log in (ADMINCP)

Rackzen - January 25, 2014, 6:05 am

First at all , you should scan the website my friend ! :)

To do it , you can use Acunetix .. :)

Crescendo - January 25, 2014, 6:08 am

Can anyone do it for me?, i don't know what is Acunetix. :D

Rackzen - January 25, 2014, 6:35 am

Don't worry bro ! :))

Please check that thread (<https://hackforums.net/showthread.php?tid=3639974>) It's mine ! :)

Crescendo - January 25, 2014, 6:38 am

what i can do with it exactly? thanks in advance.

Syhime - January 25, 2014, 7:57 am

You can search hidden page's from the website, and you can see if its vulnerable

Crescendo - January 25, 2014, 8:44 am

savvymatthew - January 25, 2014, 8:58 am

There might be a way.

but posting a pic of a login page with a W isnt helping much.

Whats the forum in ? vbulletin forum or what ?

Or posting the site will help :)

Moms1976 - January 25, 2014, 9:48 am

Do you just want access to wordpress?

Bo Burnham. - January 25, 2014, 9:52 am

Hmm W.. W.. W.

WAIT i got it! Try thuis login info:

Name: WorldPad

Password: SuchWow

(Dont click in Remember me, that will give them your IP and police will bust your ass)

You're welcome. ?

Crescendo - January 25, 2014, 10:03 am

We can lead a horse to water, but we can't lead a retard to water.

Dadamam - January 25, 2014, 10:36 am

He's trying to access the [admin panel](#) of [this forum](#) which uses WordPress.

You could snoop around in the WordPress files and try to find an SQL or XSS vulnerability. Once you found that, you can either use SQL injection to get data or upload a PHP shell if you find a vulnerability in an uploader ...

Crescendo - January 25, 2014, 10:36 am

(Jan 25, 2014 11:32 AM)savvymatthew Wrote: [\[CITE\]](#) Im lost have no clue what your trying to do ?

you trying to access what ?

Basically, i want just to log in administrator control panel, so thats mean i want to have the control (i dont want to get any access in FORUMS), jus to log IN (ADMIN-CP).

Dadamam - January 25, 2014, 10:38 am

(Jan 25, 2014 11:36 AM)Crescendo Wrote: [\[CITE\]](#) Basically, i want just to log in administrator control

panel, so that means I want to have the control (I don't want to get any access in FORUMS), just to log IN (ADMIN-CP).

This post is most likely to give you a step by step tutorial on how to achieve what you want:

Crescendo - January 25, 2014, 10:41 am

I will be paid for it, if anyone can help me. just contact me in skype:L2darkzone

savvymatthew - January 25, 2014, 10:42 am

Well Dadamam said it pretty well :)

If you have no clue on how to do that

better read up over here [Website Hacking](#)

Or ask someone to scan the site for you in that thread area.

(Jan 25, 2014 11:38 AM) Dadamam Wrote: [\[CITE\]](#) This post is most likely to give you a step by step tutorial on how to achieve what you want:

Is that really the pass ? LOL I thought that was a troll

What's the forum in ? vbulletin forum or what ?

Or posting the site will help :)

WOW . Skid.

@OP

1. It's a WordPress login page /wplogin.php or /wpadmin

2. To be able to hack into WordPress I would suggest you to do some information gathering about the website i.e. what plugins does it use, Version number . If it's a shared server etc.

3. Once you have the information , you must start to Google if there are any publicly available methods to exploit .

4. Exploit!

legend259 - January 25, 2014, 10:54 am

I added you dude go check skype out ASAP

Crescendo - January 25, 2014, 12:07 pm

savvymatthew - January 25, 2014, 12:12 pm

Dude didnt you post this already ?

Stay in one thread.

Crescendo - January 25, 2014, 12:13 pm

Bro, i need help, and about to hack it they need 231827381273812euros. lolled

savvymatthew - January 25, 2014, 12:16 pm

You cant double post.. ok

If you paying someone to do it.. go here

<https://hackforums.net/forumdisplay.php?fid=48>

And dont fucking post the same shit.

Effexion - January 25, 2014, 12:17 pm

Forum looks pretty clean. I actually went to register, and look at this, I lol'd:

<https://gyazo.com/cb4bb8ba527df928c9307896dd27dd0b>

bobd432 - January 25, 2014, 1:13 pm

It does not appear to be vulnerable to be sql injectable. Maybe another experienced person can find something and help you as I am very new also. You should read up on some tutorials to learn more about sql injection.

Coxetamine - January 25, 2014, 1:16 pm

Lmao :_D
Great forum indeed ? ?

Balkani - January 25, 2014, 1:24 pm

Just check out the forums, they are plenty tutorials there type in your keyword that you search tho

Imperious1 - January 25, 2014, 1:47 pm

Find the MyBB version of the forum. Then, proceed to search for vulnerabilities/exploits (in that mybb version) on the web.

x41N - January 25, 2014, 1:49 pm

Holy shit 21 posts and L33T already nice man xD

On Topic: Check what board and what version they are using and looks for exploits on the web.

Crescendo - January 25, 2014, 1:55 pm

Can anyone hack it for me?, or ddos the site?, i'll pay him.

Effexion - January 25, 2014, 4:19 pm

Great forum indeed ? ?

Yeah, turns out '7' was the correct answer. So '2' is now a letter.

Jagster™ - January 25, 2014, 7:19 pm

FUCKING ???

"L2pride" needs to be in the dictionary IMO. ?
