Doesn't seem to be working for me (tested it on 5 different computers).

Looks like I'll just have to opt for a paid one. Thanks anyway :)

Edit: Accidentally ran it on myself. It's creating hundreds of copies of itself in my Appdata folder,

and launching itself hundreds of times until my computer is unusable. No wonder it wasn't working on my slaves!

Is the process for the miner persistent? If I had clicked on the stub and it began to mine, and then I turned off my computer and then turned it back on would the process stay? (Would the stub keep mining even after a restart)

He said it was persistent. So yes, if anyone turns their computer off or restarts it then it will be installed back on to their computer.

So I presume, correct me if I am wrong.

looks great thanks for sharinggg :))

akaCurse - July 27, 2014, 6:16 pm

This is very good. very excited for this. Thanks in advance!

mafiaboy17 - July 30, 2014, 4:04 pm

I can't seem to set it up. Will you be able to help me out?

taurus2000 - July 31, 2014, 8:02 am

So if the victim open the exe, it will show the file that the miner is working, is there any possibility to hide that window too? Because i want to put the exe in start ups.

Thank you

Infiidel - July 31, 2014, 8:24 am

looks really neat, too bad I dont have a botnet to go with it :(

taurus2000 - August 5, 2014, 2:36 am

hey, does this work with blackcoin too?

I've got no anti sandboxie lol :P

can you explain step by step what i need to fill in the deadcow miner software because my exe data that i built dont work it give me a error and i dont know how to fix it.

sikkler88 - January 21, 2015, 7:43 am

Hi i have buy your Produkt please Pm me

JamesHen - January 31, 2015, 12:37 am

hey thanks for providing this free tool!

does it mine using GPU or only CPU? because i dont see any options for gpu/cpu so i think its only CPU? in that case which algo would u recommend mining scrypt or sha256

Relief_ - February 22, 2015, 12:23 pm

Thanks! Love this <3! Will have to buy the non-free edition :3

CJamie - April 12, 2015, 6:29 am

Oh nice I one, thanks! I wanna start in minning with bots so this comes in handy.

If I would spread a silent miner made by this program, what would be the best actions to not get caught later for illegal activity like this? Any tips? Also after using AegisCryptor on the miner, the miner doesn't work for some reason. As you can tell, I'm new to this.

Richard Sherman - July 18, 2016, 12:55 am

is it even worth mining BTC now-a-days? heard its not worth your time anymore.

This miner also mines litecoins. I heard something like that about BTC too, so I switched to LTC :)

Rottapotta - July 18, 2016, 6:33 am

Bitcoin mining isnt worth it, from what I have heard of.

zirtooo - July 18, 2016, 6:38 am

Oh nice I one, thanks! I wanna start in minning with bots so this comes in handy.

SIM-3206556 - July 18, 2016, 10:40 am

Well this program definitely works, but I can't make the bot undetectable by any free crypters. Any tips?

mark9095 - July 22, 2016, 12:37 pm

Thanks dude I like it so far!
