Thread: [\[GOOGLE CHROME\] Chrome detecting malware](#)

gaingaillo - January 25, 2014, 9:47 am

It's annoying. It stays clear for some hours then chrome flags my .exe as malware and I cannot use it anymore. I'm using icryptex.

Is that happening because i'm using a public crypter? Are there any ways to fix this?

Edit: maybe i wasn't clear enough..
This happens:

Grey 59 - January 25, 2014, 10:06 am

Well, I do not understand your situation clearly.. But, you're exe is probably not FUD. Public Crypters become UD fast.

Pi_Rat - January 25, 2014, 10:29 am

first of all chrome is sucks... reports everything illegal activity ... second your server is not fud... the free crypters not stay fud for a long then 3-4 ours..

i sagest you to buy one private crypter ,,, cube crypter is good and cheap . take a look

Use a private crypter and make sure to not upload it to any public scanning sites.

Target™ - January 25, 2014, 10:34 am

Try buying a paid crypter. Your file is getting detected or maybe if you can't afford a paid one maybe try out a different browser. Doubtful,but maybe it'll work.

n0\$f3ratu\$ - January 25, 2014, 10:45 am

None of you are right.

1. Depending from which hosting site is downloaded the file will get detected or not.
2. If is not digitally signed then is detected again.

BoomShot - January 25, 2014, 11:02 am

1. Depending from which hosting site is downloaded the file will get detected or not.
2. If is not digitally signed then is detected again.

This is the correct answer.

It doesn't matter if it's FUD or not, it can be flagged.

Sometimes archiving the output can help.

qwerz - January 25, 2014, 3:01 pm

If it's legitimate, buy a legitimate fud [crypter](#) instead of free ones.

d4rkj4y - January 26, 2014, 5:14 pm

Put it in a winrar file, how hard can it be?

Daxe - January 26, 2014, 6:41 pm

Go to settings then advanced and turn off malware detecion

shexx-- - January 27, 2014, 1:18 am

this his your heberger !

go upload it on rghost and take the direct link !

AlphaRays - January 27, 2014, 4:59 am

I have a solution of this issue. Pm for I will tell you.

CyBEr_JeDi - January 27, 2014, 5:34 am

Click show all downloads, when you see the list of everything it will give you an option to recover the file.

ZuGgY - January 27, 2014, 5:37 am

Yeah Chome picks up the smallest shit fast.

Just try on Firefox ;)

PvPscapex - January 27, 2014, 6:00 am

Does that to everything I download that is not downloaded often Just Rar it
