Thread: [\[MyBB\] Avatar dimensions in posts & threads are not changing.](#)

Argyle - January 25, 2014, 1:24 pm

Changed in "Show Thread Options" to 150x150:

User Registration and Profile Options to 200x200:

Member List to 150x10:

I tried what it said on this thread:

<http://community.mybb.com/thread-114371-nextnewest.html>

Quote:your forum's current theme has a fixed width & fixed height for avatar images in postbit_avatar template - removing it fixes the issue ..

This is everything in postbit_avatar:

Code

How the post avatar looks currently:

Proof that it has not changed dimensions:

When I note [<!-- -->] the postbit_avatar, avatars disappear from the site.

I have tried re-uploading and hosting the avatar on imgur every time I change a setting.

Is there an other setting I forget to check? Thanks to anyone that can help in advance.

I must ask this ...

Are you sure that the IMG even is that big?

Those are just the Max. dimensions.

Those are just the Max. dimensions.

Avatar dimensions shows properly on profiles:

The setting is set to 200x200, but the avatar does not exceed that:

Mr. Carter - *January 26, 2014, 2:34 pm*

What sizes do you want to make em ?

Tho you can also make it like this,

```
<a href="{ $post['profilelink_plain']}"></a>
```
