Thread: [Shutting down a website](#)

Eleqtriq V2 - January 25, 2014, 3:02 pm

The website is www.sphaxball.com

It has two ips - 209.141.48.131 209.141.39.26

Its Teamspeak ip is this - 205.185.118.253 Pass is Romo if u want to join

Im wondering how to shut it down without buying/making a botnet.

The owner really pissed me off and i need revenge.

Thanks

Gimli - January 25, 2014, 3:03 pm

Want revenge? go hire a hitman instead and learn to use the damn search function :/

Wtf. i think no one will do this for free.

just buy yourself a booter :D
