Thread: [\[HELP\] fb mass auto-tag phishing?](#)

Rohit901 - January 26, 2014, 1:15 am

So guys, today i just noticed this fb page giving this link telling that open any fb profile go to inspect element and if you put this in console it will hack the person's profile, I Din't try it but my friend who tried it was scammed, he auto tagged Mass number of his friends unknowingly in the comment box thus making the post more Popular. So im finding any Professional here who could tell me how does this script work... and maybe how to use it ._. P.M me if you are interested in checking out the script i will give u the pastebin link.

Bro look at this Picture u will understand and Do look at the comment box okay? that mass auto tag its unknowingly Done, here is the picture: now the fb took some quick action and the page seems to be banned.

the page itself had 4k likes how can the post have so many shares and likes then? and comments look at every1 tagging their fnds and increasing the page popularity, i hope u can understand what i mean

[BUMP]

Respond to this please ._.
