Thread: [Help with Hacking Facebook Password and E-mail Password](#)

bluesky56 - January 27, 2014, 5:26 am

I am looking for a sure method that allow me to hack facebook and e-mail.

I tried with RAT and Phishing and Pharming (DNS Spoofing) but these methods don't work always and it require a user interaction and sometime the target could be noticed if an attacker use these methods. Using RAT it happens that the keylogger's feature could not work because a target can use a MAC or Android. About phishing attack it happens that Google Chrome or other Broswer and antivirus can block the fraudulent website.

Honestly I am looking for a method that allow me to hack all facebook passwords and e-mail passwords. I know bruteforce but it require many time and it is not working correctly.

Someone know other methods that allow to get social network password and e-mail account password?

If someone is interested, please PM me.

What makes you think that people will share that "Almighty Method" with you and make it public anyway?? (If that exists of course)

itzx vizuh - January 27, 2014, 8:38 am

I think you should try social engineering and recover the account

You are right, but social engineering it is very difficult than other techniques. However thanks for the suggestion.

hey I have a Program calld ringlogger, you can send a photo tu a person and dee will click you will

see what de wil do

Bluffer - January 27, 2014, 7:48 pm

If you look around there's a program for sale that searches through thousands of words to find your victim's password, look around for it I think it's like 20\$.

R3callingE3L - January 27, 2014, 7:49 pm

nobody really knows if it exists. if it did. someone would be selling it for lots of money

gregoking17 - February 27, 2014, 11:06 pm

just a noob. with a strong facination an desire to gain the correct knowledge. in all areas of I.T
?
??

any one with suggestions on where to begin learning. as far as security infiltration.

quazar-78 - February 9, 2015, 2:21 pm

I need a Crack a .rar with password i Try somo software liek a ARCH and Bundle but i dont have any good result, anyone can Helpme (payjob) PM please

Comedic - February 9, 2015, 7:23 pm

Of course it exists. Use your head if you're gonna try recovering the account or figure out other ways. Brute forcing is a popular way too, or hire someone to do it. Gl

Jdb899 - December 6, 2016, 5:55 pm

I need some help too in getting a password. I am willing to pay.

chris1464 - May 22, 2017, 6:43 pm

anybody find a reliable source to pay for this
