Thread: [Epic Java - #1 JDB | Tjdb7_45 | Sjdb7_17 | Autobuy | Templates | Hosting | All OS's |](#)

NoodleBot™ - February 19, 2014, 3:31 pm

We will be adding the latest version of Java to the Java Drive by Generator when it is available. For now, the traditional JDB works for Java Version 7 Update 45 and under whilst silent works for Java Version 7 Update 17 and under. Please be patient while we work on adding the latest version.

Any legitimate business looking to use applets can purchase a signing certificate for relatively cheap. Also, due to the nature of how things like this are implemented, I don't see any exploits coming out any time soon (if ever) to bypass this.

GLWS though, looks nice.

NoodleBot™ - February 20, 2014, 7:32 pm

Can vouch for these guys ! Always great support, they never ever leave their customers alone !

GLWS Noodle :D

MaYa666 - February 22, 2014, 3:26 pm

Nice product and nice man Noodlebot when time i see him and write to him he always answer my questions he is so kind and good person! Vouch for this product!

Vector Dynamics - February 22, 2014, 3:51 pm

What's the advantages and the disadvantages with this product compared to FoxyJDB?

NoodleBot™ - February 22, 2014, 3:59 pm

(Feb 22, 2014 04:51 PM)Vector Dynamics Wrote: [\[CITE\]](#) What's the advantages and the disadvantages with this product compared to FoxyJDB?

We offer top notch customer support if needed and provide unique, custom templates and web domains for all customers to use.

With constantly updating software, you're never going to miss out. Look forward to some new features entering Epic Java shortly as well, such as;

- Page Views Tracking
- Add your own private domains automatically
- Update dashboard stats on refresh instead of re-logging.
- Troubleshooter (Will identify problems with your JDB)
- Fallback method for the silent (will go to traditional if java version is 17 or lower)

dogfuker - February 23, 2014, 2:57 pm

Do you have an ETA on when the latest version of java will be available?

NoodleBot™ - February 23, 2014, 4:12 pm

(Feb 23, 2014 03:57 PM)Derby Wrote: [\[CITE\]](#) Do you have an ETA on when the latest version of java will be available?

Whenever a traditional jdb for the latest version exists, you will see it here.

QoL?? - March 1, 2014, 10:48 pm

If I use the Silent applet and the user has an updated version, will it show the "run this time/Always Run" or whatever? I do not want that. Will definitely buy if it does not include this.

NoodleBot™ - March 1, 2014, 11:45 pm

(Mar 1, 2014 11:48 PM)Imagine Dragons Wrote: [\[CITE\]](#) If I use the Silent applet and the user has an updated version, will it show the "run this time/Always Run" or whatever? I do not want that. Will definitely buy if it does not include this.

They would see the permission slip regardless if they have an Updated Java, silent or traditional.

Our V2 update however which will be released later this month will feature a similar setting as well as a few others listed here, but many more;

- Page Views Tracking
- Add your own private domains automatically
- Update dashboard stats on refresh instead of re-logging.
- Troubleshooter (Will identify problems with your JDB)
- Fallback method for the silent (will go to traditional if java version is above silent thresholds)
- more stability.

QoL?? - March 1, 2014, 11:55 pm

(Mar 2, 2014 12:45 AM)NoodleBot™ Wrote: [\[CITE\]](#) They would see the permission slip regardless if they have an Updated Java, silent or traditional.

So for the silent version they will see the slip, but it will run anyway? How long does it take for the S/JDB's to finish installing? Would I be able to copy a site like adf.ly to make it more enticing for users to wait if it takes awhile to install?

NoodleBot™ - March 2, 2014, 10:19 pm

(Mar 2, 2014 12:55 AM)Imagine Dragons Wrote: [\[CITE\]](#) So for the silent version they will see the slip, but it will run anyway? How long does it take for the S/JDB's to finish installing? If they have a higher version of Java then is supported by our Silent applet (7.17) then the permission slip will appear. Running the applet manually of the silent JDB will not work as it is designed to only run silently if it meets the correct parameters.

Our traditional JDB is also running still for Java version 7 Update 45 (7.45) and lower. The

traditional applet will always show the permission, and applet.

The JDB's speed performance is based on how large your file.exe is. a 1mb file will take a second or two longer then 400kb for example, varying with different internet providers, VPN's, etc.

Adf.ly is not recommended for any malware usage.

QoL?? - March 2, 2014, 10:24 pm

I'm asking if they DO have a java lower than the requirement to run silently and the silent is enabled, will they see the permission slip? And on the Adf.ly subject, do you have a template that is similar to Adf.ly in the aspect that it has a timer or some other way to keep them on the site for the file to run?

(Mar 2, 2014 11:19 PM)NoodleBot™ Wrote: [\[CITE\]](#) If they have a higher version of Java then is supported by our Silent applet (7.17) then the permission slip will appear. NoodleBot™ - March 2, 2014, 10:50 pm

Yes they will end up seeing the permission slip on silent if they do not have the right java versions, is what I mentioned above...

In the future the silent applet will redirect to traditional upon failure.

We will consider your Adf.ly template idea, I'm sure this can be done in the future.

QoL?? - March 2, 2014, 10:55 pm

NO! I am asking if they DO have the java versions that the Silent applet can operate with, will they see the permission slip?

NoodleBot™ - March 2, 2014, 11:09 pm

Ah sorry, I did not seem to catch that.

In FireFox and Chrome it will ask you to 'Allow' Java, there is no way to remove this, however, they still do not and won't see the applet itself.

IE is fully silent.

QoL?? - March 2, 2014, 11:12 pm

(Mar 3, 2014 12:09 AM)NoodleBot™ Wrote: [\[CITE\]](#) Ah sorry, I did not seem to catch that.

Alright. So say I set it to forward to a new page after installation. As soon as my file is executed, they are taken to a new page and it does not have the slip at the top, correct?

NoodleBot™ - March 2, 2014, 11:30 pm

Yes redirection will do exactly what you just said! ;) it will even redirect to the real website in their address bar.

QoL?? - March 2, 2014, 11:36 pm

(Mar 3, 2014 12:30 AM)NoodleBot™ Wrote: [\[CITE\]](#) Yes redirection will do exactly what you just said! ;) it will even redirect to the real website in their address bar.

Unfortunately, this is sad and honest reality when dealing with products on the internet, let alone HackForums. Expect downtime, not every product is online 100% of the time.

If you choose to not renew your license due to downtime, that is out of our control and I thank you for your support anyways.

(Mar 12, 2014 10:16 AM)Guereva Wrote: [\[CITE\]](#) I've been waiting quite some time for the website to be up.. :/

EREB0S - March 12, 2014, 2:07 pm

Any news about the TJDB for Java v7 u51 ?

I hear Epic Java works on a update for this, so the TJDB works on Java v7 u51.

Is that right?

NoodleBot™ - March 12, 2014, 2:08 pm

(Mar 12, 2014 02:07 PM)EREB0S Wrote: [\[CITE\]](#) Any news about the TJDB for Java v7 u51 ?

I hear Epic Java works on a update for this, so the TJDB works on Java v7 u51.

Is that right?

There is currently no Traditional Java drive by for Java Version 7 Update 51.

degado - March 12, 2014, 2:30 pm

sad very sad...!!! that's means no proper use until the latest exploit will work.

Machos - March 12, 2014, 2:44 pm

(Mar 12, 2014 02:30 PM)snufas Wrote: [\[CITE\]](#) sad very sad...!!! that's means no proper use until the latest exploit will work.

Epic java cant help this. Latest java update fixed exploits.

NoodleBot™ - March 12, 2014, 4:27 pm

(Mar 12, 2014 02:30 PM)snufas Wrote: [\[CITE\]](#) sad very sad...!!! that's means no proper use until the latest exploit will work.

The traditional Java drive by is not an exploit. It is a standard feature of java applets, and recently had it's security settings and permissions changed during the newest update released, Java Version 7 Update 51.

Whilst there is no way to use the Traditional JDB on people with that version, some however will be able to run it if they have manually altered their Java configurations (.i.e runescape players who may not want to update to the newest java, will use the same old one they had before and just ignore the settings.)

With all that being said, the traditional Java drive by that we provide on Epic Java was exclusively made for the older version (which was the current version at the time), and will still work 100% fine for this version and lower.

R3v3r\$4I - March 12, 2014, 5:11 pm

Epic java has always been a great product.

I hope that in the future you can upgrade that also works with version 51

As always, keep it up guys ..

EREB0S - March 13, 2014, 5:12 am

Is there a way that the traditional Java driveby with version 7 update 51 works?

I do not care what it costs! I am willing to pay the price!

I've heard you need a trusted certificate, the \$ 200 cost.

Razza™ - March 14, 2014, 5:25 pm

(Mar 13, 2014 05:12 AM)EREB0S Wrote: [\[CITE\]](#) Is there a way that the traditional Java driveby with version 7 update 51 works?

I do not care what it costs! I am willing to pay the price!

I've heard you need a trusted certificate, the \$ 200 cost.

Hello, within the first couple of days of version 51, we purchased a certificate to try it out and it got suspended within 1 day.

However, the traditional is still working on version 45 and lower, as for the silent, it still works for version 17 and lower. This is only temporary for the traditional until we find an exploit or if we can find another solution.

NoodleBot™ - March 15, 2014, 11:25 am

Apocaliptique - March 29, 2014, 8:06 am

This java drive by seems very powerfull, he is really FUD,
I recommend to buy this product

C=APHP?C=HA - March 30, 2014, 12:15 pm

I see news about Java 8 being released, anyone knows anything about it?

Emoclaw - March 30, 2014, 12:34 pm

I've just received my credentials for Epic Java. The panel looks amazing, will edit later with a review.

NoodleBot™ - March 30, 2014, 2:03 pm

(Mar 30, 2014 12:15 PM)28122003 Wrote: [\[CITE\]](#) I see news about Java 8 being released, anyone knows anything about it?

Yes I have Java 8 and am working with it to see if any changes to the certificate can be done manually.

For now, our Traditional JDB remains working for Java Versions 7 Update 45 and lower. When the traditional java drive by is able to work for either 7.51 or a future update, we'll be the first to have it.

NoodleBot™ - March 31, 2014, 7:14 pm

Omgrazza has had to step out for a couple days hopefully at max, but possibly longer due to some important personal medical issues. Without going into detail I will let you know that work will continue when Omgrazza is back and ready to work.

Everything is still fully rolling in the meantime.

Please be patient and thanks for bearing with us.

Onnza - March 31, 2014, 8:07 pm

Legit! Works Just as advertised! Better than others i have trusted :)

Hope Omgrazza is okay

R3v3r\$4I - April 1, 2014, 4:50 am

(Mar 31, 2014 07:14 PM)NoodleBot™ Wrote: [\[CITE\]](#) Omgrazza has had to step out for a couple days hopefully at max, but possibly longer due to some important personal medical issues. Without going into detail I will let you know that work will continue when Omgrazza is back and ready to work.

BlackMotion - April 2, 2014, 12:59 pm

Whats execution rate today, if i have 10k daily visitor ?

NoodleBot™ - April 2, 2014, 1:56 pm

(Apr 2, 2014 12:59 PM)BlackMotion Wrote: [\[CITE\]](#) Whats execution rate today, if i have 10k daily visitor ?

That would greatly depend on your visitors Java Versions installed. There is no way to possibly determine an execution rate for something installed on billions of machines.

Soulwrath95 - April 2, 2014, 4:05 pm

Great JDB, The staff are helpful and friendly, plus the site looks awesome. 10/10 would buy again.

NoodleBot™ - April 2, 2014, 9:30 pm

Thanks for the vouch mate we appreciate it a bunch.

We're still rolling with this project and additional work will continue and be completed (it's nearly done!) as soon as possible.

If you have requests, questions, tips, hints, etc or if you just need help. Then do not hesitate and contact us! At: <http://epic-software.net/chat/client.php>

Regulator - April 3, 2014, 1:38 am

It looks like your website has been down since 3/29, any update on this?

Vector Dynamics - April 3, 2014, 8:05 am

Bought this but haven't received any email about credentials :(

NoodleBot™ - April 3, 2014, 11:56 am

Website is online and running fine, PM me to receive the latest link. The link was changed so that attacks can be minimized while Omgrazza is away. It is to be kept private.

(Apr 3, 2014 08:05 AM)Vector Dynamics Wrote: [\[CITE\]](#) Bought this but haven't received any email about credentials :(

I believe you've purchased before, so our autobuy system cannot overwrite your old license. Please contact me with payment information and I'll extend the older account instead.

puresownes44 - April 4, 2014, 3:07 pm

I vouch for this guy verry HQ member and allways ready to help GoodLuck with sales :) i will buy one version of this asap

Hayley - April 6, 2014, 6:56 am

Just bought this, didn't get any credentials to my mail, thought it was automatic.

NoodleBot™ - April 6, 2014, 7:12 pm

(Apr 6, 2014 06:56 AM)Dimenxion Wrote: [\[CITE\]](#) Just bought this, didn't get any credentials to my mail, thought it was automatic.

I have just resolved the issue with the autobuy system not delivering accounts automatically. Sorry about that!

Everything is back to normal with the website cloner, and Epic Java's exclusive templates have been restored. Thanks for bearing with us.

Update for newest java.... pretty much no point in developing anything else until you get an exploit for latest java

NoodleBot™ - April 24, 2014, 6:55 pm

(Apr 24, 2014 06:34 PM)alanshearer Wrote: [\[CITE\]](#) Update for newest java.... pretty much no point in developing anything else until you get an exploit for latest java

Of course. This will be added as soon as it exists!

Pentatonic - April 25, 2014, 4:34 am

One question does this JDB takes use off an Java exploit or uses signed Jar to bypass the security measures?

SIM-1079811 - April 25, 2014, 9:42 am

(Apr 24, 2014 06:55 PM)NoodleBot™ Wrote: [\[CITE\]](#) Of course. This will be added as soon as it exists!

Yes but why dont you actually search for it? Rather than relying on someone else to find it... JDB are dead without newest update, literally no point in anyone purchasing a JDB till new update is out

NoodleBot™ - April 25, 2014, 10:50 am

(Apr 25, 2014 04:34 AM)Pentatonic Wrote: [\[CITE\]](#) One question does this JDB takes use off an Java exploit or uses signed Jar to bypass the security measures?

This question can be broken down into two parts:

(Basing this off traditional)

Is the jar signed; Yes.

Is the JDB an exploit; No.

1) A 'self signed' certificate is not worth the bits it is written on. If you can make a certificate that claims it is you, I can just as easily forge one.

That is why the JRE lists the publisher as 'unknown'. It does not matter who they claim to be, it is ignored unless the certificate has been verified by a trusted authority.

2) The traditional Java Drive By is not an exploit. It is a standard feature of the way that Java Applets were designed to function. Meanwhile the silent Java Applet contains an exploit that will allow the Java Applet to be bypassed for the correct versions of Java.

(Apr 25, 2014 09:42 AM)alanshearer Wrote: [\[CITE\]](#) Yes but why dont you actually search for it? Rather than relying on someone else to find it... JDB are dead without newest update, literally no point in anyone purchasing a JDB till new update is out

You cannot search for something that does not exist at the moment.

While we respect your opinion, the fact is that JDB's are far from dead. Many of our users have purchased license renewals and many new customers have purchased, willingly even after discussing the latest update news.

While there is not a drive-by for the latest version, most if not all versions remain there as they were before and always will be. Of course when a new way to perform the drive by occurs, we will be adding this to the drive-by ASAP.

NoodleBot™ - April 26, 2014, 4:00 pm

I hope you can find bypass for 51/55 soon ?

Dmoore - May 9, 2014, 12:15 am

I trust these guys, and i really hope they find a way around 51/55 soon...waiting patiently.

NoodleBot™ - May 9, 2014, 11:14 am

We're experiencing some downtime due to complications with the cloudflare service.
We are resolving asap and we kindly ask for your patience on this matter. Sorry for any inconvenience.

SIM-1079811 - May 9, 2014, 1:57 pm

(May 9, 2014 12:15 AM)Dmoore Wrote: [\[CITE\]](#) I trust these guys, and i really hope they find a way around 51/55 soon...waiting patiently.

They have been 'trying' for months, but in reality i don't think they search for an exploit at all, just waiting for someone else to find it, which seems unlikely.

HfBananaSuckersEatShitz - May 9, 2014, 7:20 pm

Should I buy it now or wait some more time?

Fenixas - May 10, 2014, 3:59 am

Please send me new login page link. Old one does not work and i was away for a while.
Thank you.

Do4Got - May 10, 2014, 8:57 am

Please send me new login page link.

the.xAx - May 12, 2014, 2:54 am

I to dont have link to new login page...

Biochef - May 12, 2014, 5:23 pm

Please, also send me the new login page.

NoodleBot™ - May 12, 2014, 9:18 pm

any news about website? It still down

NoodleBot™ - May 15, 2014, 1:22 pm

Sorry for the delay guys. We are taking this downtime to rev up construction on V2.

Due to complications or jealousy someone has been constantly attacking the server and domains were using. As follows the hosting and domain have been suspended.

We will have everything up soon. Don't worry if you've got an existing license with us as we always extend users licenses during any downtime or bugs in the panel.

R3v3r\$4l - May 15, 2014, 1:39 pm

Sorry about this, I think many are envious because you offer an excellent service and very serious. I hope version 2 will be ready very soon. I wish you a good job ..

the.xAx - May 15, 2014, 11:11 pm

I buy this and this working for me one day. After panel all time is down.

Any JDB and exploits on HF is shitly now?

NICOTINE. - May 16, 2014, 5:14 pm

after you fix this problem i will buy this javadrive by

it seems good

7H3 3XP3R7 - May 17, 2014, 11:02 am

i have added you on skype but still not accepted from 2 days ago.

NICOTINE. - May 17, 2014, 5:34 pm

and me also add you in skype

but i didnt get any accpted

NoodleBot™ - May 17, 2014, 5:40 pm

I've just added most of my requests - my skype was offline for a while due to some errors with my system. I'm online and informing current and to-be customers of the situation.

K-Pax - May 17, 2014, 10:36 pm

I want to buy but look this:

<http://epic-software.net/buy/>

Not Found

The requested URL /buy/ was not found on this server.

neger20 - May 20, 2014, 2:35 am

this is the end of the epic java? just let me know, if this project is dead.

it down so long time.

NoodleBot™ - May 21, 2014, 1:40 pm

The project is not dead, at the moment we are just having some problems with our host and due to some IRL complications we are short of expenses. We're working on it; or an alternate solution ASAP.

bk23 - May 23, 2014, 2:39 pm

Please let me know when it is back up ... I would like to buy

SIM-1079811 - May 29, 2014, 7:43 pm

panel still down ??? message way too damn short what the hell

Kristofferson - May 30, 2014, 5:56 pm

Well I'd love to look into it, but after the auction thread of it, I'm unsure what will happen to the brand.

NoodleBot™ - May 30, 2014, 9:41 pm

This is currently not for sale at the moment.

The new owners of the product will continue the service as normal with the customer base as it stands.

Razza™ - May 31, 2014, 4:05 am

(May 30, 2014 09:43 PM)Lana Del Rey? Wrote: [\[CITE\]](#) Glad to see the new owners will be continuing the service. What is the new owners name? And will they be managing the new thread?

All of the details will be given once the deal is done.

jcbullet - May 31, 2014, 4:09 am

When will this be sold again...really eager to get this !

R3v3r\$4I - June 9, 2014, 7:51 am

Guys there is still no news about Epic Java?

NoodleBot™ - June 9, 2014, 5:43 pm

I will update this thread tonight with some new information regarding Epic Java.

Currently at work.

R3v3r\$4I - June 9, 2014, 7:04 pm

I hope there is some good news, I was really very good with Epic Java.

I am very sorry if this project has come to an end.

Elderly appearance with some good news ..

any news about epic java? ???

NoodleBot™ - June 11, 2014, 11:48 am

Sorry I had forgotten to post my information on the thread. Will be home in roughly two hours.

Right.

So, with no guarantees but with high hopes, I want to inform you guys about a new idea I've been

having. I feel that this can bring back the popularity to the JDB's, my only dilemma is that if successful; for how long?

I've been looking at some implementations into Java that will allow the applet to do many more features that it typically does not have the ability to do right now. However, these features are more of the sort of thing you'd see on a RAT or on a crypter. Things such as disabling the registry, hiding it's process (Javaw.exe in this case) and many other strangely powerful options that really shouldn't be there, such as being able to set a preset prerequisites, meaning you could restrict the JDB to only run for users with a specific framework that you want, or users with a specific adobe version installed, or users with a specific internet browser installed, etc, the possibilities are almost endless for that aspect.

Another powerful feature that this would enable us to add, would be to attach a Java installation file of the users choice, to automatically detect on runtime; if your victim has Java installed it will do nothing but run the JDB , whilst if it detects they do not have Java installed, it will download and execute the installation file in a much sneakier way (not 100% silent) that allows the user to now run the JDB.

This may seem like a downside, if your victim freaks out by his browser trying to install an appropriate Java, however, this all seems legitimately from Oracle, and it is very useful and will greatly increase the execution and success rate of a traditional applet.

They technically don't even require to have Java installed, as it will provide the correct version to temporarily run the applet with!

Part of the idea I have will also allow the users to specify their own custom process name, descriptions etc. So rather than Javaw.exe running your Java applet, you could have Vbc.exe or Cvtres (just some quick random examples) do the dirty work instead of the suspected Javaw.exe

(Jun 11, 2014 09:01 AM)quint3 Wrote: [\[CITE\]](#) If it downloads java for them when they don't have it, and installs the necessary programs for them, doesn't that mean it'll pop UAC?

If it doesn't pop UAC i wouldn't be surprised if it would have 100% infection rate on windows.

However all of this seems too good to be true, if you are able to execute the pre-quisites somehow when they don't have java, why bother going through installing java etc if you can just drop the payload itself?

UAC I don't think will be a problem, neither an exploit nor malicious code will be used to bypass this, but rather a UAC compliant system.

I hope this can clear up some confusion, (and not confuse you instead) but this is just some ideas that I am working on and hoping to introduce to the project very soon.

Again, we thank you all for your patience and continued support, a project like ours gets nowhere without our community, feedback and customers so again, we are honored to have served you and look forward to serving you again.

I've always had a lot of confidence in this project, I have always said that it is one of the best JDB, you have always given excellent support, and your product has always been excellent.

I still have to have confidence in this, because you deserve it really.

I just hope that very soon this project active again as I was until recently.

These new ideas are excellent and I hope to again take advantage of the full power of Java Epic very soon.

We only ask that you keep us updated on the developments, you have always been very serious is accurate, then I repeat that I have a lot of faith in you.

We look forward to good news ..

In the meantime I wish you a good job ...

Tirus - June 11, 2014, 10:29 pm

Vouch for NoobleBot, great member and a great service.

I definitely recommend this JDB. GLWS.

Regards, ?

NoodleBot™ - July 12, 2014, 3:29 pm

We're working on it. Don't want to excite anyone just yet but I'll update this thread later. Away for the weekend due to some funeral plans.

R3v3r\$4l - August 11, 2014, 7:15 am

Hello NoodleBot™

Still no news about the service?

I hope you will give us good news soon ..

Nikolasi - August 11, 2014, 10:47 pm

Hmm ,will be better if NoodleBot™ make that in mozilla firefox exploit.

Mozilla firefox exploit working for all mozilla firefox versions.

NoodleBot™ - August 25, 2014, 6:00 pm

I will be closing this thread now. If anything comes up I will open up a new thread.

We thank you all for your continued loyalty and support. We appreciate your business and our understanding is appreciated.

Thanks again everyone, and stay safe.
