Thread: [\[TuT\] How To Encrypt Your Deface Page \[HTML\]](#)

ChapTs - January 28, 2014, 7:02 am

Heeeelo Hackforums! ?

I have before tried, that my self made deface page, have been stolen and then they use it, in they're own html index site. Therefore I would like to share a website with all you guys, where you can encrypt your HTML source.

You can find it here: [Encrypter](#)

If you find it useful, then please leave a post! ?

Have a great day! ? ?

lol lets pretend he's just uneducated in this area.

While you're on the right track, OP, this doesn't actually prevent anyone from using your html. It just makes it a little more difficult to read.

copying and pasting the code will still work just the same.

ChapTs - January 28, 2014, 11:14 am

Ooohm... It's kinda just so nobody else steal it, and uses it, in they're own html index site.

Chills - January 28, 2014, 11:18 am

Well yeah this is encryption...but one of the least secure types.

It'll stop skid from stealing your sauce, but anyone who knows a bit about computers can easily translate it back

Anxuein - January 28, 2014, 11:27 am

What is the point? Anyone can just decrypt it with a simple Google search.

ChapTs - January 28, 2014, 11:30 am

Oooohm.... I've kinda just seen a lot of newbies on the forum asking about different things. Therefore I just wanted to help them a bit, if they didn't knew this.

ChapTs - January 28, 2014, 11:39 am

No problem ;) I'm glad that someone could use it!

agik - January 28, 2014, 11:58 am

nice man , great jobs, ty ! I will contact you , look your mp

I don't have posted enough, so I can't send and receive PM's!

wurmtOngue - January 28, 2014, 6:22 pm

Awesome tutorial dude, keep up the learns.

ChapTs - January 29, 2014, 6:26 am

Thank you, dude! :) I tried to keep it simple!

KnockSteadys - February 2, 2014, 3:18 pm

thanks this a cool tut on how to do this it will help alot

ChapTs - February 3, 2014, 6:56 am

No problem ;) I'm just glad that I could help :)

FractumSeraph - February 3, 2014, 7:01 am

I'll be honest. I never knew you could do this... I understand now, I just never thought about it.. Lol.
Not very useful perhaps, but thanks for sharing!
