Ouch man, get better soon. Does it work for andromedia? A assume it does because of the EOF option, but what's best option to choose for runPE?

When you format, your HWID changed hence why it's locked, it's to prevent people sharing their licenses. PM me your Net Seal username and I'll reset it.

I am requesting from last 5 hours to unlock my licence which got locked because by mistake. But

none has responded , not jamie and not R3m0h, so I am forced to post it here. I bought cube cryptor 3 days back.

Edit: R3m0h is very helpful person, unlocked my account within minutes.
Thanks bro, your crypter is great and I am planning to get it for 6 months.

Cheers!!

Hello 4th dimension.

I bought your crypter. Its very nice :)

My one and only problem is, when i test the Crypted server, it takes about 10-20 sec to execute. I havent turned delay execution on.

Is there a way to open the crypted server faster?

Thanks and greetings

You cant use an AV on your system but you cant use a VM....

Average FUD time is 2 Days and ESET is always the first AV that gets it (atm it is FUD)

??Tommy - February 26, 2014, 7:00 am

You should really re-consider using Scan4you, I've heard they Distribute to ESET

That wouldn't be surprising since ESET is allways the first to get detected on most hf crypter

If this is FUD right now, 0/60 I will be purchasing :D

Just purchased wanna see how this works :D

I'll be going on holidays from tomorrow for 5 days. I won't be online as much as I'm normally am.

Thanks :)

This is FUD 0/60. Super excited going to buy installs.

Chr0nicHax - March 3, 2014, 12:29 am

Is ESET detecting cvtres injection? I executed the crypted file when it was 0/60.
And ESET found the injection in cvtres when executing.
The day after the file is 4/60. I'll do some testing in own lab later on.
Can anybody else confirm this pls?

Just going to post my review now that my license is up.

I only got a FUD stub twice during my whole license, which made me give up on it. When it did get FUD, it lasted less than a day which resulted in me losing all my slaves. The scanner only worked half the time as well. I am very dissatisfied with this crypter overall.

Hey I'm having trouble with my crypts tried sending to a friend with a beast PC and he said his AV blocked it, I did all the settings from the video with my plasma RAT.

I installed some AVs in VM and tried running my crypt in them. Norton, Avast, TrendMicro, BitDefender (There the only ones I tried) All blocked it on Runtime but the scanner in the cryptor said 0/60?

The VM's had the net off and were wiped after so the sample can't be distributed.

Scanner in Cube Crypter works perfect for me. Sometimes it gave You error but just click OK and click scan again....

Stub was update like 2 days ago (seems that 4thDimension is busy) but i still can make 100% FUD file.... If You don't know How to Crypt Files It's bad.... Yes i had at 1st time today 10/39 but after 3 more crypts it was 3/39 2/39 and 0/39... OMG it's not like put file click some stuff build scan and get FUD.. Use Your brain... You didn't get FUD ?? Hm... seems strange cuz I almost always have FUD even after 2-3 days out of update...

TIPS: If it's high detection:

Change assambly

Add FUD HD ICON

You can BUMP SIZE (If You are spreading with Crack keyGen etc) It's good to BUMp size even up to 15MB...

1 Option can +/- Detection.. (Compress Hide File Delay Execution etc)

Updates are bad? It was updated almost each 24H or sometimes even each 12h.. Now it's 2 days old stub but still it's can be FUD....

Crypter update released, the scan result is FUD but there's a little bug with it since I had to recode all my crypter, the crypter might corrupt crypted files sometimes, if it does just reencrypt until your file works. I'm working on fixing this.

I disagree with you. He was online yesterday you can check his profile. No matter how busy he is, it won't take him few minutes to respond to customers that have paid for his product. I purchased Plasma Rat use only for few days license was taken off and nothing has been done about it, another guy bought Cube crypter, No email was sent for 24hrs. makeittakeit00 - May 24, 2014, 5:04 pm

4th dimension-

Sir, if I did something to disrupt or violate your terms, I am sorry. But all I can ask for is an explanation. I have been a polite and respectable buyer with the hf community. your crypter is the only one I can get to crypt plasma correctly. I know you know all this and have read it several times, but sake of context ill cover it. The 1st purchase was locked after a few days because I reformatted, and then after several emails/messages/ PM's I chalked it up to you just being too busy, and unable to handle such a large customer base load. After writing about once a week re-asking for a HWID update to unlock my net seal login (I apologize if this is too much, or too bothersome...but when your software subscription is only 4 weeks, I think I am well within my ground to nicely ask you to activate my acct at that time interval)

ANYways, as I said, I chalked it as a loss, put plasma back up on the shelf, and patiently waited the remaining 3 weeks til my script ran out, so I could go ahead and purchase a FRESH copy. I know how stupid that sounds after the customer service I received, but its the only fuggin crypter that seems to truly be compatible with all its functions, and I very much like the plasma miner. So.... I BUY ANOTHER CUBE CRYPTER. put in my new serial. it is still locked. I wrote 4th again about it few days ago. but after all the ignored emails, im not expecting much.

But still, I consider myself an understanding person and assumed that he's just too busy to deal with small time customers who purchase 1 month at a time. As a vendor, that's a great problem to have. But I must say Im pretty shocked that despite the way I handled my emails/ PMs, nicely asking for an unlock so I could enjoy atleast a few days of my paid for scription, that you never unlocked it..let alone give me a response of ANYTHING.

A response that says, 'hey man,sorry im too busy to deal with your business right now I have much more important things to deal with right now so fuck off' I would've VERY much appreciated that. so I wouldn't have to keep checking my email msgs every day, worrying about writing yet another weekly email thinking ' ohh I don't know should I write another msg? I know I paid for this & cannot use it..but I don't want to piss him off ' yes I do think like that because I am an empathetic piece of shit at times.

you have no idea how much I hate writing msgs like this...id rather pass a kidney stone and shit constipated blood simultaneously than have to write these bullshit msgs. it fucking sucks, but I have

no other options at this pt.

4th dimension: I say this with complete sincerity. yes purchasing another crypter from you after I got no use of my 1st purchase was very, very stupid on my part. But I just want to crypt plasma. that is it. You have a popular product, and for all I know, having to deal with a locked netseal login from a reformat is a huge pain in the ass that takes a lot of time to update for me and (though I would've gladly paid extra if that's what's needed). ---But at this point, I am just going to kindly ask for a refund; NOT for the 1st purchase. just the purchase from 2 days ago.

Sorry to have to write this crap on this thread. I am just bummed out that I waited almost a month just so I could try and buy a new 1 on my newly reformatted OS..and getting the same locked msg just sent me over the top. It's been a rough cpl days, hopefully author can understand.

PS for what it's all worth, the few days I did get a chance to crypt plasma, it worked great.

Have you checked the same email as your paypal including the spam folder? If you have checked and cannot find it please send 4th Dimension your transaction id and tell him you did not receive it upon purchase.

It's a problem with Netseal, as it's doing it with other programs that use Netseal for me.

YourCoinNightmare - June 8, 2014, 9:02 am

When I try to open netseal its closing immediatelly....

Can I have one test crypted file, soo I can be sure I will buy the quality crypter, wich I bought before long time ago when Cube Crypter was at it's start.

If I get FUD/Working ItSelf file and sable for Windows XP, I will pay for the crypter.

Must add that Cube Crypter was making the files unstable for Windows XP OS users. Allways was crashing and starting.

I just want to say I'm not proper support for this product, I am not currently using it but I have used it in the past.

From what I see there, make sure you have up to date .NET framework installed.

It does work on 64-bit systems as it worked just fine on mine.

So it does bypass norton sonar and other norton proactives? :D

Yes, it bypasses norton proactives. However, if the behavior of your rat/bot/etc is flagged it won't make it undetectable as it is almost impossible to 'encrypt' the behavior of an application.

Can you explain a bit this? I think I didn't understand at all. So if I crypt my stub with your crypter, it

will be detectable for norton? o_O

If your RAT drops files on the disk for example, it will get detected, it's impossible to modify your RAT behaviour.

So if I want to upload a new stub 'cause I think that detection by norton sonar is near, it will be detected... ./ damm

No. If your RAT drops something detected, it will obviously be detected. The same thing will happen if you use your RAT's startup method, most of the antiviruses will detect it (there are exceptions).
But keep in mind that all the crypters will act the same way.

unoquepasaba - August 5, 2014, 9:12 am

And how do I know which things that can drop my rat are detected?

blizzarz - August 5, 2014, 12:13 pm

Well I will have to disagree....

I have been a return customer and to be honest sometimes the updates are slower than others, but there are plenty of options to play with to find a FUD setup.

I went from 11 detection rate to FUD just last night playing with settings.
Learn to use the WHOLE product and it will work better.

That said you can't blame the crypter for not being FUD, they are detected because people scan with the wrong tools, people report the files, bla, bla, bla nothing to do with the coder/crypter.

I have checked my private messages and you never contacted me about this. The crypter might not be FUD sometimes, but I try to update it as soon as there's a detection.

You probably didn't use the right settings and that's why you were getting bad scan results, but since you didn't contact me, I couldn't know that you needed help.

4th Dimension - September 23, 2014, 11:31 am

Alright, I will provide refunds for all the people who have bought the crypter from the 1st of september.

If you want to get your money back, PM me with a maximum of payment proofs such as the transaction ID, e-mail, screenshot, coinbase order ID, etc.

You are only asked to provide enough information and to use "REFUND" as the subject of your message.

For the people who have opened a scam report/community alert/or any thread depreciating Cube, close it ENTIRELY, change the title if you can and update your thread.

For your intend, there is no scam as you accepted the TOS when you bought the crypter. I obviously know that there is no point in buying a non-fud crypter and that you all feel scammed, I'm also not an asshole, that's why I'm offering refunds.

Refunding everyone might take some time (not too long though), so be patient and DON'T SPAM/STALK ME.

If you paid via PayPal and opened a chargeback you need to know that your chances of getting a refund will highly be lowered, I will check manually to see if you deserve a refund or not. Same thing

applies if you insulted me, threatened me, etc.
ANY INCOMPLETE REQUEST WILL BE IGNORED.

Cube Crypter will come back, don't worry. I am closing the sales for the moment.

Roofiezz - September 24, 2014, 4:18 am

Hi i purchased cube around a month ago from now. i really didn't get much usage out of it as it was never really FUD / my license was locked for a few days for no reason which i pm'd you on skype and you fixed up.. am i eligible for a refund? thanks

martigo333 - September 27, 2014, 6:50 am

I'm still waiting for my REFUND.....please can it be done asap because I need my funds thank you.

Roofiezz - September 27, 2014, 8:24 pm

Such a shit service, Bought a months it was hardly FUD, licence was locked for no reason at all for about 4 days. don't recommend buying in the future if he brings out new version

4thDumbmension is known for his shit services and run-with-money tactics.

Do not EVER buy ANYTHING from this funny guy.

PlasmaRAT - totally ripped pockets of his trusted customers making promises and ignored the project ENTIRELY to let it die because he ripped just the money he wanted.

Cube - again, totally ABUSED and RIPPED his trusted customers - and again, MONEY is the only thing that counts for him, customers are a total shit to abuse.

Not NanoCore or Wire but Noobmension is one of the biggest RATs on this forum. Read this. Comprehend this. Internalize this. Live with this. THE TRUTH HAS BEEN TOLD

Experience: So the first day I bought the crypter I trusted the in build scanner and got a 0 out of whatever it was detection rate.

The second day I got a message from my friend saying that it had a 8/55 detection rate on virustotal so I decided to try it myself.

When I scanned it it had gone from 8/55 to 22/55 detection rate in 1 day. This is absolute bullsh*t Aegis crypter is better than this sh*t. Im charging my f*cking money back. DO NOT BUY THIS CRYPTER IT SUCKS!
