No sorry, don't have any vouch copies to give out as this is Version 2 open for public.

|Parzival| - January 28, 2014, 2:26 pm

Noob question:

Can I use your software only for mining, without crypting a rat?

I want both a miner and a crypter, but I don't need the crypter right now. However, getting both at the same time would be a good idea.

Miki - January 28, 2014, 2:29 pm

(Jan 28, 2014 03:26 PM)xoxid Wrote: [\[CITE\]](#) Noob question:

Can I use your software only for mining, without crypting a rat?

I want both a miner and a crypter, but I don't need the crypter right now. However, getting both at the same time would be a good idea.

Yes you can, just use the miner on its own, but if you want the miner to be FUD use the crypter provided. Yes only one on the market at the moment.

Jagster™ - January 28, 2014, 2:35 pm

Looks really clean and very user friendly, I love the built-in miner concept, very original!!! I may look into to purchasing a license in the near future if I start RATting again.

Good Luck with Sales Miki!

~Jagster

Vouch for miki. HQ Seller on HF. GLWS

helsikke - January 29, 2014, 9:04 am

Hi, i am considering purchasing your product. I just hope to get some help first as i am what u would call a complete noob at hacking.

Basically, i am looking to use this crypter on DarkComet (most likely, feel free to change my mind), and my basic idea is to infect it via images. However, will i need anything else than your product (the

crypter) and Darkcomet (or any other R.A.Ts) and are there a lot of complications involved in these processes? It sounds very easy from what i've heard, but nothing in life is easy.

Thanks in advance, Helsikke.

ajayu1992 - January 29, 2014, 9:06 am

Vouch for my friend here. !! Legit guy:)

Miki - January 29, 2014, 9:11 am

LastKingz - March 18, 2014, 5:37 am

wow vouch for it the crypter is almost perfect ?

mdmazingx - March 18, 2014, 8:12 am

I don't understand, is this a potential bitcoin/altcoin miner aswell? If one were interested in spreading + mass mining with infected PCs is this the best choice?

secretumpiratica - March 18, 2014, 8:37 am

Hello. I have a ADRAMAX Keylogger that I binded with a .jpg using Shock Labs v1. It works perfectly but it detected by MSE and other virus protection when It is downloaded. (but if I scan it with MSE, it says its clean). I want to give it to my friend, but it is always detected by his MSE. I need a FUD crypter that actually works. Mainly just MSE and Norton FUD but the more other FUD the better. I can't PM anyone because I just got on here. Thanks.

ILoveGreen - March 18, 2014, 9:44 am

Thanks for seeing my interest and messaging me! I have 2 questions: 1 Does it spoof exe to .pdf

and such? I am 5 posts away from being able to PM!! Yay!

Hey am trying to pay for this with btc where are the instructions? is it autopay>?

monsterhawt - March 18, 2014, 12:17 pm

(Mar 18, 2014 08:12 AM)mdmazingx Wrote: [\[CITE\]](#) I don't understand, is this a potential bitcoin/altcoin miner as well? If one were interested in spreading + mass mining with infected PCs is this the best choice?

You're right, this crypter has a built in miner!

ILoveGreen - March 18, 2014, 1:45 pm

Hey guys i had 3 important questions i am trying to clarify something here! 1) If i intend on mining would a Fud miner like this one + darkcomet or njrat (i have these 2) be enough? Or Do i need a botnet? 2) If i need a botnet how does it differ from a RAT + miner? and 3) can slaves be bought and imported into Rats? or only Botnets? (if i wanted to buy lets say someones server with slaves already)

thanks also if there is a thread that already answer these questions clearly feel free to link me to it...

Miki - March 18, 2014, 2:14 pm

just cant seem to get it 0/39 any ideas :) did try many icons

this program does crash a lot windows 2008

You do complete opposite of what I told you to do ???.

Look Simple DC with crappy Icon : <https://anonscanner.com/scan/z8ob3i160x>

Now DC UPX and private HQ Icons/ can get good HQ Icons from www.iconarchive.com :

I had .net support ticked also did try it with just inject itself no go crash

Firstly, I'm getting 0 detections with the right settings. Secondly please re-check all settings of plasma rat and of the crypter!

Btw, Plasma is native, so you don't need .Net support!

Habs - March 27, 2014, 12:31 pm

I tried contacting you on skype and pm yesterday, i only need help for like a minute :/

Addetroop - March 27, 2014, 1:37 pm

ok so i am just wondering, do i need to portforward or something?, and is any of the compatabilities above free to use? i know blackshades isnt ?

Habs - March 27, 2014, 2:34 pm

(Mar 27, 2014 01:37 PM)Addetroop Wrote: [CITE](#) ok so i am just wondering, do i need to portforward or something?, and is any of the compatabilities above free to use? i know blackshades isnt ?

If you are ratting you need to port forward this is a crypter to make your RAT undetectable from anti-viruses, i suggest njrat or if you want a lot of features use darkcomet.

Addetroop - March 27, 2014, 2:40 pm

i want to use it not only locally, so i dont know what to do really, and what ports do i have to use?

coolerfarmer - March 27, 2014, 2:43 pm

I'm sorry that I couldn't help anyone in the last day!

I will be online tomorrow to assist you all :P

K44n - March 27, 2014, 2:49 pm

Can someone bind my im 3.0 stub with a picture for a proof.

PM for skype

Addetroop - March 27, 2014, 3:12 pm

do i have to portforward to use darkcomet with diverse crypter version 2?

coolerfarmer - March 27, 2014, 3:16 pm

(Mar 27, 2014 03:12 PM)Addetroop Wrote: [CITE](#) do i have to portforward to use darkcomet with diverse crypter version 2?

This has noting to do with the crypter!

It depends on the Rat!

In your case you have to portforward!

But you can always use a php rat or a botnet if you can't portforward! (or buy a vpn)

Addetroop - March 27, 2014, 3:16 pm

happy birthday coolerfarmer!!!! :D hope you have a nice day! :D

anyway sorry about the questions about darkcomet and rat, so about the crypter, is it possible to make it go in stealth, so the person cant see it all? and is it possible to camouflage the file so it doesnt show that its a exe file (example= picture.jpg/png 120kb)

btw i cant find the buy button where is it?

coolerfarmer - March 27, 2014, 10:52 pm

Can anyone give me some screenshots of the Builder Tab from Plasma RAT? I want to make a Tutorial for the settings of the most common RATs, but I don't own Plasma!

BTW, Crypter is FUD and up for sale!

Miki - April 1, 2014, 10:08 am

i consider to buy this crypter may i know whts the stub size after crypting and is it .net dependent ???

Belgian - April 18, 2014, 11:46 am

This looks like a very good crypter.

Good luck with your sales, OP.

Miki - April 18, 2014, 12:35 pm

(Apr 18, 2014 11:44 AM)bikezone Wrote: [\[CITE\]](#) i consider to buy this crypter may i know whts the stub size after crypting and is it .net dependent ???

Pmed you all information mate and no .net dependency.

mildgreen - April 19, 2014, 10:46 am

could you explain why the crypter drops a "driver-grap.exe" into the appdata-folder and puts it into hkcu autostart as "Windows"?

coolerfarmer - April 19, 2014, 12:02 pm

(Apr 18, 2014 11:46 AM)Belgian Wrote: [\[CITE\]](#) This looks like a very good crypter.

Good luck with your sales, OP.

Thank you!

Crypter is FUD and up for sale! Pm me for any information!

calgon93 - April 20, 2014, 5:05 pm

Peppermint Butler - July 1, 2014, 11:52 am

I feel like stating in the title "Miner" is a bit misleading, although I would have to say this crypter looks pretty nice.

Miki - July 1, 2014, 1:32 pm

Oh so it actually has a miner within the crypter? Im confused since you advised other miners on the thread.

" Recommended Miners: "

DeadCow Miner

Nyx Miner

Miki - July 1, 2014, 2:49 pm

" Recommended Miners: "

DeadCow Miner

Nyx Miner

Miner is built it and can be enabled as an extra feature, basic mining supported, that's advertisement for something else more in depth features on those. ?

Got it!

Can you go into more detail for me on the miner?

Does it have:

- silent mining
- gpu support
- reg persistence

Thanks.

Miki - July 2, 2014, 1:12 am

Thanks.

Normal mining not silent, CPU only atm, normal persistence but persistence from the crypter is very strong.
