1- Go to ACP -> Templates & Styles -> Templates -> Your skin template -> Header Templates -> header_welcomeblock_guest

Right on top of the code add this:

```
Code <style>#avviso {
background: #000;
margin-right: 7px;
color: #9C0;
font-size: 10px;
border: 0px
solid #94c2e8;
padding: 8px;
-moz-border-radius: 8px;
-webkit-border-radius: 8px;
filter:alpha(opacity=88);
-moz-opacity:.88; opacity:.88;
-moz-box-shadow:5px 5px 5px #191919;
-webkit-box-shadow:5px 5px 5px #191919;
box-shadow:5px 5px 5px #191919;
}
```

```
#avviso a:link {
color: red; text-decoration: none;
}
```

```
#avviso a:visited {
color: red; text-decoration: none;
}
```

```
#avviso a:hover, #avviso a:active {
color: #fff;
text-decoration:
underline;
}
```

```
.avviso_fixed {
height: auto;
position: fixed;
top:80%;
right: 2%;
width: 280px;
}
```

```
</style><div class="avviso_fixed"><div id="avviso">Welcome!! To see all content in the site/forum
```

and post messages, you must Register or login to your Account!</div></div>

Seems usefull for people who don't have any knowledge regarding HTML / CSS.

Thanks for sharing.

Rapist?

Ill be adding a lot more tutorials soon to help people out.

BrainDeadGenius - January 29, 2014, 8:30 am

This is not useful at all for anyone who has no clue how to use HTML or CSS because it is so far from being complete code.

I never said this was complete code, but it should be helpful to someone, somewhere.

Now that you've updated it, my only suggestion would be a non-fixed message. Fixed content is a pain in the ass for most users, and horrid on mobile devices, for the most part.
