Thread: [looking for mentor](#)

JJ iz Kronik - May 4, 2010, 7:53 pm

Looking for some one to teach me the ways of ddosing and to set me up with some bots

Riseing - May 4, 2010, 7:55 pm

C++,C# or VB? What is better and why?

Answer that.

Tyga - May 4, 2010, 7:56 pm

Answer that.

I believe your trying to test him, but on coding languages? Why would that be necessary?

OP, I am ok with simple botnets mostly client based, but I do know a good 2 cents of IRC. If you do need basic help, feel free to shoot me a PM.

JJ iz Kronik - May 4, 2010, 7:59 pm

C++ because you have a lot more freedom and your not restricted by the dot net framework

Ok that's good you can pm me if you need help and I'll answer the best I can.

Oxidium - May 4, 2010, 8:15 pm

He Googled it, I don't wanna hear it.

Sparky - May 4, 2010, 8:18 pm

I'll mentor you. If you allow me to address you as "Wee Little tadpole"

Shin-Akuma - May 4, 2010, 8:27 pm

C++ is a strong typed language so no, you don't have more freedom. You're actually really restricted by your compiler on data types.
