1. When you apply the Bronze/Silver/Gold strategy you always need to put a very HIGH price to the gold one, to make your product look like it's very professional and the high price at the gold package will automatically draw their eyes to the silver/bronze one giving more sales.

2. Your guide is good but it takes more than this to make a good landing page, it's not everybody that can call themselves a copywriter, I mostly advise people to go on Odesk or something similar and pay someone to write the landing page. It's so much worth it.

1. True, great advice. :)

2. Yes, that's not nearly all of it. Paying could be a good option, especially with sites like Fiverr.
