Hello.

I understand your supplier sells these codes and they're multi-regional which means they can be used on multiple times on regions such as OCE - EUW - NA - EUNE.

PAX TF is what we're looking for, how much would you sell it for? The code that can be used on NA & OCE at the same time.

Please do PM me as I'll forget about this thread tomorrow, thank you.

since my supplier is on around those times.

I can get you a Kayle for EUW. It might be a bit more if thats okay, but yeah I can get one for you. As for the Twisted Fate, there are only NA & OCE codes if i'm not mistaken.

You can bundle on them if you transfer to OCE.

If you need a CS riven, I can get ahold of a supplier to get you one. It wouldn't be cheap it'd probably be around 160 Euros or even more, and more than likely you'd have to do a server transfer as there are only around 300 codes left until they print more (I don't think they are)

Indeed they're kinda rare, since these other sellers opened up business is slow but no worries.
Either way their rare but also common now days.
