Thread: [Whos got a good place to get a server for a IRC](#)

Blocked - January 30, 2014, 12:47 pm

Okay so im need of some IRC hosting, so can someone send me link to a good host?

Six-Nine - January 30, 2014, 12:48 pm

Like always, Google is your best friend!

I hate these answers. Do you think he should google "irc botnet hosting" and hope it's not honeypots ?

Of course it can be found on google but if he's asking here it's because google won't always give the best thing and he won't do it with a review/advice.

Anyway, here is a c/p of a post from bull+ stuff :

Semi Bullet proof host .

- 1- maxided
- 2-ecatel
- 3-hostkey

100% bullet proof

- 1- Cyber bunker
- 2- Alt host
- 3- TaoBao

Protip: if people are posting publicly about it being bulletproof, it isn't bulletproof.

maybeDeToX - January 30, 2014, 6:11 pm

monovm is okay also they take several days to get ready and setup.

These servers are good.
Maybe you can get one from [HERE](#)

Nothing you find on HackForums will suffice.

Stay away from HackForums hosting.
