Thread: [Looking for hackercraft partner/team!](#)

The l33t hax0r - January 30, 2014, 1:48 pm

Hey all, I'm looking for a team/some partners to make a base with. I've been playing minecraft since 1.8, mainly faction servers so I know what I am doing. If anyone wants to team up post below or PM me!

Minecraft name: Boston_Bruins_SD

I'll team up with you, if you want. I wouldn't mind an extra hand.

I was recently raided and are venturing to some high cords, I have some cobble and dirt already. PM me if you're interested?

Good luck finding some buddies to team up with and be very careful with who you trust as raiding happens quite a bit on the server.

Good luck with whoever you team up with though and hope to see you guys on the server ^o^

I'd team up, although things like this never work out,

Be very careful on whom you choose!

Anyone else wanna team up?

So far it is just me and Etak!
