Thread: [How to make a Runpe Module ?](#)

revtorus - May 5, 2010, 2:07 am

Hi All ! ^^

First of all i wanna thank all of you guys who really helped me a lot !!!

In order to make my own Crypter (Scantime + Runtime) i already code the encrypting methods functions (Rc4 , XOR) and i also add EOF command (End Of File) but i block in coding the Runpe Module T_T i have seen some Runpe codes sources but they are so messy that i can't indersstand a thing x') exemple (Private const HSBGFDQBHDJKHS as long) and i cannot see this fonction in the module etc

So i was wondering if someone can help me with tips/Tutorials that help in creating a Runpe Module

I'm looking forward for your answers

Thanks A lot =)

Have a nice day . ^^

EDIT : I code in Visual Basic 6

t0fx - May 5, 2010, 2:13 am

vb6, vb.net?, C#? ...

revtorus - May 5, 2010, 2:15 am

Visual Basic 6 sorry i forgot to add it ^^"

revtorus - May 5, 2010, 5:55 am

Up please ! ^^"

Anyone wants to help me ? x_X

XACTLYSIN - May 14, 2010, 12:57 pm

I have the same problem with vb8

This wont help him, he's trying to understand how a runpe works and he wants to make his own. Plus the RunpeGen would him give stuff like "Const as Long = asdaskdjashdiauzwq9kas" again... useless. Apart from the fact that he's coding in VB6 and you're link is including just a vb.NET runpeGEN.

Search for a not generated but a original runpe without random strings to make it unique and then try to get a clue of how it works... yeah easier said than done :P, i mean debugg it and set breakpoints and look at the stuff while its in action, then you might get a clue on how it works.

I dont know what VB6 looks like and what you can do with it or what options you do have but try to do what i said and it might help you ;)

RockYy - good night :P

//

For example this should be a good runpe in VB6 to learn from :

<https://hackforums.net/showthread.php?tid=204038>

And remember the functionality of your runpe depends on the .exe you inject to... at least in vb.net

...

Diazepa - October 1, 2010, 3:28 pm

So he wants a TuT on how to make a RunPE Generator himself? :P

Well, it would probably be valuable information but there are so many working ones out there, so it wouldn't have any value other than the educational one (Not saying that's a bad thing, coding to learn is great!) :)

But if he's doing it for the thrill of the coding, like I often do - then whatever floats his boat!
I love using advanced applications I made myself :)

No, making a RunPE Generator is easy if you have a normal runpe, you can code your own Generator even without knowing how a runpe itself works.

He wants to learn how to make a single RunPE.

And I don't know if there are any VB 6 RunpeGENs but anyway we're not talking about generators.

dxanthony - April 11, 2012, 10:26 pm

I think that learning how to code the RunPE yourself is the best choice .

Give a man a fish and you feed him for a day. Teach a man to fish and you feed him for a lifetime. (If you want to feed the man in the first place :P)

1337x1337 - April 11, 2012, 10:50 pm

It's not that hard to refud it you just need to know what to do. Just split the file first. The detected output and then scan and take a look at the detected parts. If that helps try to change that part in the source and compile it again. Do that until it's undetected for a specific anti-engine.

Hi Guys,

I've also got the same problem coding in c# and done with the encryption and writing encrypted data to stub just need a runpe variant I can use to execute the decrypted exe. but honestly I'd rather learn it myself. So If anyone has an idea where I can get help or if you can offer the help yourself it'll be pretty awesome. I guess there should be like step by step functions I can follow to learn it on the long run.
