Thread: [Backend Resolving Service | Reveal True Backend IP Addresses | Works On ANY Website](#)

regexks_ - January 31, 2014, 9:26 pm

I can resolve the backend IP addresses of servers hiding behind Cloudflare and any commercially or non-commercially available reverse proxy using conventional methods. I will also use non-conventional methods in case conventional methods fail.

I will normally provide the backend IP address within 24 hours of receiving the domain in question. I also have a near 100% success rate.

Price: \$25/domain

I accept PayPal and BTC.

XMPP: regexks_@exploit.im

SiteKiller - February 1, 2014, 12:55 am

hi - this looks awesome

are there any vouch copies going? I could use a service like this.

Angel Beats?? - February 1, 2014, 12:56 am

Do your methods include SEing?

If they do I know this method :P

Tastylicious - February 1, 2014, 1:01 am

(Feb 1, 2014 01:58 AM)AdditionX Wrote: [\[CITE\]](#) Thanks! Im Providing A Free one here :).

<http://www.cloudflare-watch.org/cfs.html>

Free and not working, now stop hijacking threads!

regexks_ - February 1, 2014, 2:26 am

(Feb 1, 2014 01:56 AM)Snapchat Wrote: [\[CITE\]](#) Do your methods include SEing?

If they do I know this method :P

No. My methods include testing for common misconfigurations, some bruteforcing and very wide internet scans.

I'm not trying to release my methods but that's the gist of it.

So searching for common unprotected subdomains, and googling the website's old IP records isn't a part of your method? ?

regexks_ - February 1, 2014, 2:42 am

That's what Fierce is for. My private methods involve HTTP/1.1 requests to the entirety of the internet.

So basically you've got a giant database of the entire internet requesting data at random times? Interesting

regexks_ - February 1, 2014, 2:46 am

No, I've got port 80 enumerated (port scan). I send a GET request for / from every single host on that list. If it responds with the right page, it's your target.

ComponY - February 6, 2014, 9:21 pm

Vouch for Regex. He's always selling good services, and products. Never fails to satisfy me.

regexks_ - February 7, 2014, 12:05 am

Thank you for the vouch ?

Available for any requests at this time.

T3h Hack3r - February 7, 2014, 2:08 am

Vouch for regexks_ and the uniqueness of this methodology compared to other services offered on hackforums.

The Invoker - February 7, 2014, 3:47 am

Regex, the scanner is public bro.

You choose Title Name , and you can IP Ranges

SharePro - February 7, 2014, 5:45 am

I guess a safe doesn't sell security - rather instead time - question is how much time :)

regexks_ - February 7, 2014, 5:58 am

Why do you always insist that my shit is public...

I can assure you that it isn't.

imgeybro - February 7, 2014, 11:07 am

works amazing he got the backend to my target.

Squishy - February 7, 2014, 11:13 am

How about CDNSolution?

Can you get the backend of websites using them?

imgeybro - February 7, 2014, 11:23 am

(Feb 7, 2014 12:13 PM)Abstraxion Wrote: [\[CITE\]](#) How about CDNSolution?

Yes. There is absolutely no service that can protect websites from my disclosure methods.

bugga - February 7, 2014, 11:38 am

I will be sure to pass this on to one or two people who clearly need it. All too often people have a cry that stressers are down when it's just they don't get that people protect sites with reverse proxy's.

regexks_ - February 7, 2014, 11:46 am

This.

There's always something behind the reverse proxy ;)

?Fear - February 7, 2014, 12:56 pm

Vouching for this, Rege got through Cloudflare and got an IP I needed. Thanks.

Soccer - February 7, 2014, 1:01 pm

Thanks for this amazing service, got a vouch resolve here and I was very satisfied.

regexks_ - February 7, 2014, 1:45 pm

Thanks for all of your support and vouches.

Servers are currently busy and working on requests. Please get to me as soon as possible to make sure your request is completed as soon as possible.

Alanay - February 8, 2014, 11:26 am

Vouch for Regexs_ he's a pro.

Could probably make a robotic limb irl.

xhflhkeuhwguu34 - February 8, 2014, 11:27 am

?

regexks_ - February 8, 2014, 11:31 am

I am in fact sorely underpricing. You are the third person to mention this.

regexks_ - June 2, 2014, 2:33 am

Service is back up and running. Contact me for more information.

regexks_ - *June 14, 2014, 10:27 pm*

Resolving backends faster than people can drop them. Payment in BTC only. Done in 24 hours!
Contact via XMPP.

Local - *September 24, 2014, 4:38 pm*

I can vouch for this service I have seen some of his work and it has never failed to amaze me.

ghost0001 - *November 28, 2014, 10:10 pm*

I have a site that crimeflare hasn't worked on, nor dns bruteforcing, hoping this service still works.
