Hey, Anyone here knows where I can buy monster energy(We only have around 4 kinds where I live) , cocaine energy, and other kind of energy drinks that mostly doesn't get sold in the EU. I've looked on ebay and stuff like that but it costs a lot to ship it all the way over here.

Im looking for this as well. I used Candyonline.nl once (They sell all kinds of energy), its a dutch store but the ship around the EU, but this is kinda expensive just like Ebay if you outside of The Netherlands. If you find something, then let me know

Yeah, I know it's expensive to ship them because it's heavy, but shipping from USA costs like 2x what the energy cost itself

This Cocaine branded stuff looks like it'll get you wired fast. The UK has an online outlet [here](#) offering the same product (I believe), just under a different brand design. Unfortunately, I could find no on-site legal disclaimers anywhere indicating it's a legitimate distributor. Purchase at your own discretion.

You can buy them in Spain or holland
Like Green,Yellow,Purple,Orange,Red
And alot more of colours :D

That would be expensive if it's the one from USA, would cost like 2x the amount the energy drinks cost themselves. And amazon in UK only has a few rares

What kind of rare drinks are you looking for? I've seen a few (of what I would call) rare energy drinks

from time to time in my local news agents. They once had marijuana and some other strange flavour.

Any links from online shops in EU where I can buy them would be perfect

wow crazy i can walk 1 block away from my house walk into any gas station and choose from hundreds of energy drinks maybe i should sell American candy and drinks down there i know how to smuggle stuff cheap in a shipping container.

I've tried the Cocaine energy drink before. It's REALLY sweet, a little too sweet, and it left me with a headache lol. Redbull has always stayed my favorite even with all of the options we have in the US

Still none knows a website in the EU where you can buy USA energy drinks? or a place there doesn't take millions for shipping to EU if you buy alot?
