What makes this different from free tools

HelpMePI0x - February 2, 2014, 7:54 am

(Feb 2, 2014 08:51 AM)Explo1t Wrote: [\[CITE\]](#) What makes this different from free tools

Our product is much, much faster and unlike other tools that just check an account, our tool also checks the subscription because not all accounts have streaming. We also always take suggestions to make our program the best.

I'll be making a video today to show it's speed and features.

Explo1t - February 2, 2014, 8:30 am

I'll be making a video today to show it's speed and features. It is possible to save only streaming accounts in sentry MBA, if you are using the web login page speed is going to be same, can you tell me the number of combo it checks per minute?

You can search leaked Netflix account lists, and scan them. This'll mostly give a few good accounts.

When you purchase I can send you a list of 5k accounts. But just googling will provide you with thousands of accounts.

I've checked thousands of accounts and never had a problem. Though I don't recommend checking 1mil+ accounts at once.

It can easily check well over 1k accounts. It can do one million but it would take a long time to load it so do it in smaller bits like 5k or 10k.
