Thread: [Get tens of thousands of youtube views + SUBS + LIKES- ALL REAL](#)

Hey guys. Before we start i would just like to say that many of you will know this method but don't hate if you do! Secondly i did not make these websites so do not ask for extras and what not.

youlikehits.com +BOT

youlikehits.com is an advanced like4like view4view sub4sub website. When you subscribe or like someone elses video you get points. You can then assign these points too your own video and when people view, like or subscribe they get an amount of points you set. The more they get the more you will get. Here comes the BOT part, you must download this file:

<http://dark-soft.com/setup/Setup%20YLH.bot.exe>

VIRUS SCAN FOR SETUP FILE:

<https://www.virustotal.com/en/file/0e4a1d8b399f8b31a9ff91b60a15bcb0da612e3587c556bdb1ac386581d4e69d/analysis/>

VIRUS SCAN FOR INSTALLED FILE:

<https://www.virustotal.com/en/file/bed190b28fc1651c4ec346b3bb3ea42eb8f2a21b2e7659131794422fb50e7dba/analysis/>

NOTE: NOT MY SITE AND NOT MY BOT! But use multiple accounts and also use multiple instances of this program if your CPU can take it.

I would make around ten youlikehits accounts run the bot three times on each of them using all three different methods spread out among them. Once you accumulate around 5-20 thousand points on all of them add your youtube account and say if you want subs views likes etc.. Do this on all ten. Set the amount of points they will get at ten as well. You will get 5000 - 20 000 views or likes or subs in total.

I hope you enjoyed this tutorial and sorry for the lack of tutorials as of late i was temp banned for asking for rep. It won't happen again.

This is just a fun tutorial!
