Thread: [Snipr 2.0.1.19 - Snipping Tool / .Gif Recorder](#)

Snoweyes - February 4, 2014, 12:31 pm

Snipr

-

Snipping Tool / .Gif Recorder

- About

Snipr is a freeware snipping tool created in C#.

The program saves your snipped image to the clipboard and

you can upload it to the internet or save it on your computer with just a simple click.

Snipr also have a built in .gif recorder, make a selection of your screen and encode the recorded part into a .gif image!

I've have created this application a while ago already and have been very busy with this project so I decided to share it with HackForums.

I'm also still developing and trying to improve the functionalities.

Ban - February 4, 2014, 1:04 pm

Looks like a nice clean program. I'll vouch that it is clean. ^_^

Won't be using it but looked like a fun project.

NETExplorer - February 4, 2014, 1:27 pm

Looks nice, but would even be better if you released the source.

Also, how exactly does the upload button work? Where does it upload to.

Snoweyes - February 4, 2014, 1:43 pm

(Feb 4, 2014 02:04 PM)Ban Wrote: [\[CITE\]](#) Looks like a nice clean program. I'll vouch that it is clean.

Yeah it was a fun project to work on :)!

(Feb 4, 2014 02:27 PM)PatPositron Wrote: [\[CITE\]](#) Looks nice, but would even be better if you released the source.

Also, how exactly does the upload button work? Where does it upload to.
Currently it is uploading to imgur, but i'm considering to add some more sites to upload.

fekuz - February 4, 2014, 2:09 pm

Looks nice.

here are a few ideas and some feedback

- maybe a function to edit the image "On the fly" (like drawing on it or so...)
- a History function, so we can see what we uploaded already.
- a function to chose the file format, idk if imgur supports other filetypes but i think so (jpg, bmp maybe)
- maybe other hotkeys like CTRL + 3 or something.
- i don't like the "Preview" window at all, maybe something like this ?

<https://i.imgur.com/75NUDBz.jpg>

- maybe a option to add our own upload sites, idk if it is possible.

So far, a useful application

Regards

The-One - February 5, 2014, 1:14 am

Thanks for this application, I've tested it and I can vouch that it's clean.

marvinn - February 5, 2014, 5:48 am

You could add lensert to it if you want to. I can provide you an upload API for lensert in C# <3

Snoweyes - February 5, 2014, 8:51 am

- Will add some "edit & draw" features to it if thats possible.
- History will be local or some on the web but not hosted by me :p so i will have to think about that.
- File format can be chosen of.
- I don't think i will change the hotkeys but maybe in the future.
- The style is the way it is, would like to have the same style in the whole application so won't change that.
- a FTP uploader will indeed be usefull!

(Feb 5, 2014 06:48 AM)marvinn Wrote: [\[CITE\]](#) You could add lensert to it if you want to. I can provide you an upload API for lensert in C# <3
Would like to see more about that :)

HighARc - February 5, 2014, 4:39 pm

beautiful looking program, i love the clean design. New C# programmer here, coming from ugly tkinter based gui in python C# looks good!

ProgrammerBinary - February 5, 2014, 10:57 pm

Where You learn C#. i want to learn also. Would you like to tell me where i can learn C# and can make this type of program.

Snoweyes - February 6, 2014, 12:09 am

(Feb 5, 2014 11:57 PM)ProgrammerBinary Wrote: [\[CITE\]](#) Where You learn C#. i want to learn also. Would you like to tell me where i can learn C# and can make this type of program.

Well it will actually take some time. I've learned C# at home watching YouTube video's & tutorials and ofcourse by 'doing it'. Just start a new project and learn your way in there :)

But I've also classes at school now about C# and JAVA.

ProgrammerBinary - February 6, 2014, 12:19 am

Thank You, that's really Great!

I hope soon You will make another great Tool. ?

Gundam X - February 6, 2014, 12:19 pm

i like the gui a lot. Looks very clean, keep developing it!

Snoweyes - February 12, 2014, 7:15 am

Just have updated the application!

It has a very nice draw on the fly mode built in now :).

There may be some bugs on it but will fix that any time, I've been very busy with this! ?

Screenshot:

Spoiler [\(Click to View\)](#)

The-One - February 12, 2014, 8:25 am

Awesome, very nice update :) Going to download the newest version now!

Ban - February 12, 2014, 11:14 am

Screenshot:

Spoiler [\(Click to View\)](#)

Gave the updated version a try, disable the part where it automatically is looking to capture the screen.

That could be annoying.

Instead, when someone selects capture, hide the program and let them capture the screen by left clicking. If they right click, cancel and show the form again.

Use Snagit as an example program, yours could be very much like theirs. They just have a pretty nice image editor and can record videos with their product.

Snoweyes - February 12, 2014, 11:36 am

Recording the selected part of the screen sounds like an awesome idea, gonna think about this :)

Thanks for the feedback!

Frostknight - February 14, 2014, 1:39 pm

May I see the snip source code? Really interested in it.

Best regards, <3

Lexus™ - February 17, 2014, 2:20 am

Really cool Source

Thanks Brother ! :)

M0n5t3r - February 18, 2014, 10:02 am

Thank you very much, I just installed it :P

dosproduct - February 18, 2014, 11:08 pm

beautiful looking program, i love the clean design

Carlsson94 - February 19, 2014, 12:15 am

Looks rather interesting, i'll download and try this when I get home!

Snoweyes - February 28, 2014, 9:04 am

Application has been updated to 1.0.0.10, I've fixed some bugs on the multi screen support.

Snoweyes - March 6, 2014, 11:05 am

I've just updated Snipr to a whole new level and added a .gif recorder to it!

Some updates will follow to improve some speed and fix some bugs :)

King of Clubs - March 6, 2014, 11:06 am

Does it upload automatically to imgur?

Snoweyes - March 6, 2014, 11:08 am

(Mar 6, 2014 12:06 PM)-Webb Wrote: [\[CITE\]](#) Does it upload automatically to imgur?

Well not automatically, but after you have pressed the "upload" button it does indeed!

King of Clubs - March 6, 2014, 11:10 am

(Mar 6, 2014 12:08 PM)DoggyCollin Wrote: [\[CITE\]](#) Well not automatically, but after you have pressed

the "upload" button it does indeed!

I would use this if it did indeed automatically uploaded and copied the link the the clipboard :)

Snoweyes - March 6, 2014, 11:14 am

(Mar 6, 2014 12:10 PM)-Webb Wrote: [\[CITE\]](#) I would use this if it did indeed automatically uploaded and copied the link the the clipboard :)

That wont be really appropriate because if it does you cant use the draw feature and what if the image you snipped is not good or mis'snipped? then the image will be online directly :p

The only click you will have to do is clicking "Upload" ^^

But maybe it is a nice feature to add in the settings, so it will be on my To-Do-List!

King of Clubs - March 6, 2014, 11:19 am

(Mar 6, 2014 12:14 PM)DoggyCollin Wrote: [\[CITE\]](#) That wont be really appropriate because if it does you cant use the draw feature and what if the image you snipped is not good or mis'snipped? then the image will be online directly :p

But maybe it is a nice feature to add in the settings, so it will be on my To-Do-List!

Yeah nice thought. Add a setting like "Upload Automatically". I'd totally use this if it were available

Mind sending me a PM if you ever get that feature in?

The-One - March 11, 2014, 5:13 am

Thanks for the update, I really like the updates you implement!

Snoweyes - March 14, 2014, 7:50 am

(Mar 11, 2014 05:13 AM)The-One Wrote: [\[CITE\]](#) Thanks for the update, I really like the updates you implement!

Thanks for the feedback man :)

I also implemented a new function on the preview screen that was missing there. You can now copy the edited version of you image to the clipboard with 1 simple click!

Currently version 2.0.0.3

Snoweyes - April 1, 2014, 6:29 am

Just updated Snipr to 2.0.1.4 because of the major changes inside the application!

Showmouse option on the .gif recording settings.

Filesize and resolution info added to the preview window.

UI improvement.

Encoding .gif speed improvement.

Bug fixes.

Carlsson94 - April 3, 2014, 3:50 am

Looking rather sweet, i'll take a look and download it when I get back home :)

isJad - May 27, 2014, 6:12 pm

Very helpful tool for small previews, thumbsup.

xapox - May 29, 2014, 4:35 am

Seems really clear, but there are already some programs sitting in the tray, which allows to upload it

just after.. Imho it's better option, but thanks for ur work.

Imperishable - May 29, 2014, 7:25 am

Looks great.. Would have loved to peek at the source :D

xWomanizer - May 30, 2014, 12:26 pm

Definitely interesting. I like the design and the features.

M4RX - May 30, 2014, 2:23 pm

Good luck!

Looks very good :)

-M4RX.

Snoweyes - July 25, 2014, 2:06 pm

After a long while I have been working on a new feature inside Snipr.

I have implemented a 'Add text' feature and refactored some code inside my project.

Adding text isnt 100% user friendly yet, but use able! (working on it)
(download link exists on the OP)

Snoweyes - August 4, 2014, 10:50 am

- Update 2.0.1.7

You can now change the text you have added to you image. (fonts, colors & sizes)

You can also delete the text.

Preview:

Anonmoosekaab - August 4, 2014, 7:42 pm

Going to try this out tomorrow. If it's good it will probably my favorite snipping tool.

Cisteriaso - August 6, 2014, 3:40 pm

Look very nice, i like the colours and the design. Clean and easy, keep it up.

Royal ! - August 10, 2014, 3:49 pm

Seems a Nice program, OP. Nice contribution.

Meow - August 13, 2014, 11:09 pm

Holy shit,I just uninstalled gyazo.

Awesome program! ?

Thank you very much OP.

Snoweyes - August 14, 2014, 9:02 am

(Aug 13, 2014 11:09 PM)MeowlmCat Wrote: [\[CITE\]](#) Holy shit,I just uninstalled gyazo.

Thank you very much OP.

Thats a very nice feedback!

Good to hear people actually like my software :).

Snoweyes - September 22, 2014, 2:44 am

Just published version 2.0.1.13.

What happened:

- Implemented a print function.
- Bug fixes.
- Code cleanups.

helloworldbasic - September 29, 2014, 9:26 am

how i can be sure if this isnt an virus inside ???
however very cool programz :)

Snoweyes - September 29, 2014, 10:03 am

(Sep 29, 2014 09:26 AM)helloworldbasic Wrote: [\[CITE\]](#) how i can be sure if this isnt an virus inside ???

oki dude thank you ,im already think the same

Bumper Sticker - September 29, 2014, 10:38 am

@DoggyCollin

Do you plan on releasing the source code anytime? I had a plan on making a program exactly like this -- but, I didn't know how to you know.. make it screenshot the screen. I'm still learning and it'd be cool if you can ever release a tutorial on this. If not it's alright ~ great program, nice release.

Snoweyes - September 29, 2014, 10:44 am

(Sep 29, 2014 10:38 AM)Bumper Sticker Wrote: [\[CITE\]](#) @DoggyCollin

Hello there :), i've some bad experience on releasing my software and since this is my very own project i am not planning on releasing it.

If you really would like to check out some code, you will have to open it in a assembly reader.
Because the code is not obfuscated.

Bumper Sticker - September 29, 2014, 10:48 am

(Sep 29, 2014 10:44 AM)DoggyCollin Wrote: [\[CITE\]](#) Hello there :), i've some bad experience on releasing my software and since this is my very own project i am not planning on releasing it.

Alright thank you for letting me know! I'll try that :O wouldn't it only be in binary ._. (Assembly Reader = Assembly Language)?

Snoweyes - September 29, 2014, 10:53 am

(Sep 29, 2014 10:48 AM)Bumper Sticker Wrote: [\[CITE\]](#) Alright thank you for letting me know! I'll try that :O wouldn't it only be in binary ___. (Assembly Reader = Assembly Language)?

Try out Simple Assembly Reader, ILSpy, .NET Reflector, etc.

Snoweyes - September 30, 2014, 12:12 am

(Sep 29, 2014 03:52 PM)gurgle528 Wrote: [\[CITE\]](#) I personally use [dotPeek](#) and it works very well for me

Looks nice, will try it out sometime :).

Does it have an option that you can re-assemble the code and compile it again?

Snoweyes - October 1, 2014, 9:54 am

Upgraded the application to version 2.0.1.14. (10-01-2014)

Fixed some bugs i figured out about saving the img as a .gif file.

I also refactored some code and remade the settings configuration.

Will be working on remembering used settings like the amount of draw pixels and draw color at the preview form.

I'm also thinking about making the .gif encoder a little bit faster to add an que on it while you are recording.

- Version 2.0.1.15 (10-03-2014)

Finally fixed a bug i was searching for an answer a long time! :).

The bug only showed up when u have dual monitors with different resolutions and should be fixed now.

I also implemented a feature that remembers ur last used settings like the drawing size and color.

hellopurebasic - October 13, 2014, 5:19 am

dude thax you very much.

your software is awesome ,i use it all day to make my screenshots and this is because your goody app.

Thanks you .

Snoweyes - October 24, 2014, 11:01 am

I almost refactored the whole project, remade some code and made some code clean ups but also reassigned some classes.

The code should be more readable in assembly readers now :)!

Im also working to make an better gif encoding mechanism. Im hoping the get this done soon.

- Update 2.0.1.18.

- Update 2.0.1.19

I got finally smooth snipping working :D!

It is more comfortable to snip now.

Ban - October 25, 2014, 1:40 pm

Checking back and so glad to see you adding the snipping bit.

My next suggestion is this:

CTRL + Drag w/ Square draw factors. Allow the user to edit the settings of the square size (Kinda like what Photoshop does with selection options).

You can do it proportionately So, 1 to 1, this will draw a perfect square box. 2 to 1, will draw a box 2 wide by 1 tall (or the reverse if preferred).

I didn't test the rest out but window selection is optional, get the size of a window and set the recording size to that.

You should also work with gif qualities, Small Size = Poor Quality, Large Size = High Quality (Essentially raw data). Have a slider option, 1 to 10 then figure out how to calculate the encoded size of the gif presenting in KB or MB.

From there, let them press the button to encode the gif. You might also want to consider creating a raw data file that they can save and reload to encode again with your program. This way if they want to encode the gif with different qualities they can at a later date.

The project though since I last wrote in has really improved.

Oh, lastly, for uploading: Let them have the option to enter their credentials in with Imgur and to upload to their accounts.

Snoweyes - October 25, 2014, 2:12 pm

Alright goodluck with that. Been enjoying looking at your software seeing where you get. Been trying to figure out a personal project to do for myself but can't seem to find something of interest after I finished my last one a couple months back.

:P

Astek - December 27, 2014, 12:50 am

really nice, ive been working on a similar programs gave me some ideas

thanks, keep it up ?

Snoweyes - December 27, 2014, 3:05 pm

Good to hear that people still appreciate this tool ^^ . Worked very hard on this so tnkx for the feedback!

AZADGYAN - January 2, 2015, 7:06 am

can you putting the source your program ?

TyrantKingBen - January 3, 2015, 3:09 am

Don't really need the screensnipping, but the GIF recording is a very neat idea. I'm not sure if I will ever need to make a GIF, but definitely will download and keep in my arsenal. Nice program :D !

drakZZZPT - July 4, 2015, 8:20 pm

Oh men! This all I need, i can edit the printscreen's, fast upload, vouch to this guy!

Thanks a lot.
