Thread: [Facebook remove friend prank](#)

neil5050 - February 4, 2014, 3:12 pm

1. grab someone's username first

so if their facebook url is

www.facebook.com/iamarnoldwhatever

iamarnoldwhatever is their username

go to graph.facebook.com/theirusername which in this case is

iamarnoldwhatever

so

Code graph.facebook.com/iamarnoldwhatever

at the very top you will see

"id": "100001008736880", -> copy whatever id you see and replace it with the friend id below

Code https://m.facebook.com/removefriend.php?friend_id=100001008736880&removed&_rdr

^ now from there tinyurl the above url or create some redirect url and send it to a friend to click on it

autorunman22 - February 4, 2014, 4:58 pm

Just tried it. No. You can't remove shit just by redirecting him/her to that url. The message says so but when you refresh it's still there

Well, it is a prank so..

If you sent it to a friend of yours, he would scream and shit. As it is a prank.

Nice trick but unfortunately you still have to click okay to remove the friend.

So it doesn't really work.

It just makes people confused upon clicking the link. Like I posted this on a friends wall a while back combined with my link spoof trick. All his friends clicked it and started flipping out.
