Who Soup - February 5, 2014, 12:12 am

awesome man 5/5. You have really been outdoing your self!

Who Soup - February 5, 2014, 12:42 am

(Feb 5, 2014 01:12 AM)Xchon Wrote: [\[CITE\]](#) awesome man 5/5. You have really been outdoing your self!

Thanks man, Thank you for all of your support through out the years. I know i'm tough to work with

aniketgupta - February 5, 2014, 6:23 am

thanks a lot for this mate

this is really helpful ... :)

TonyTonyChopper - February 5, 2014, 7:11 am

This program is fantastic, I've needed something that can check my lists of 40k+ proxies.

- Thanks soup

Who Soup - February 5, 2014, 11:00 am

No prob :) if there's any sites you know of that arn't already on the program please let me know, and we will add it and update.

Who Soup - February 5, 2014, 12:54 pm

@whosoup did you try hidemyass.com? they have a bunch of good proxies

Master - February 5, 2014, 5:38 pm

Very nice tutorial and tool. Looking forward to seeing more from Who Soup! I checked for outgoing connections, and everything is clean and on the up and up.

Who Soup - February 5, 2014, 9:01 pm

(Feb 5, 2014 01:54 PM)Xchon Wrote: [\[CITE\]](#) @whosoup did you try hidemyass.com? they have a bunch of good proxies possibly, I'll ask the lead programmer.

Who Soup - February 5, 2014, 9:53 pm

also can you hint us on what the new updates will have in store? I have some ideas on what i want I'll PM you in a sec

Ajithk - February 6, 2014, 10:30 am

i didnt understand what it is all. can any one explain me?

Who Soup - February 6, 2014, 4:41 pm

(Feb 6, 2014 11:30 AM)Ajithk Wrote: [\[CITE\]](#) i didnt understand what it is all. can any one explain me?

It's used to obtain updated proxies, and check if they are live or not

edurasta - February 6, 2014, 4:46 pm

great contribution , than for sharing it with us

Who Soup - February 6, 2014, 5:08 pm

^ No problem :) hope you guys like it &

(Feb 5, 2014 10:53 PM)Xchon Wrote: [\[CITE\]](#) also can you hint us on what the new updates will have in store? I have some ideas on what i want I'll PM you in a sec

I can't really say it depends on what sites will be added and that will be due to community support. We will soon be releasing another amazing program where Proxy Shark might be useful!

Who Soup - February 6, 2014, 5:32 pm

(Feb 6, 2014 06:08 PM)Who Soup Wrote: [\[CITE\]](#) ^ No problem :) hope you guys like it &

kk, do you need someone to tests your apps I'll be more than happy to?

Who Soup - February 6, 2014, 6:39 pm

(Feb 6, 2014 06:32 PM)Xchon Wrote: [\[CITE\]](#) kk, do you need someone to tests your apps I'll be more than happy to?

Not at the moment but I'll let you know if anything comes up

TonyTonyChopper - February 7, 2014, 6:40 am

Hey, quick question, when I am checking to see if the proxies are live some are yellow and say "filter ?"what does it mean by that ?

Who Soup - February 7, 2014, 7:02 pm

(Feb 7, 2014 07:40 AM)Captain Qwark Wrote: [\[CITE\]](#) Hey, quick question, when I am checking to see if the proxies are live some are yellow and say "filter ?"what does it mean by that ?

Filter means that it's filtering out the bad proxies. It either took too long to respond, or it has a port

that you set to block. By filtering those proxies they will NOT be added to the final list that gets exported.

UPDATE: Still available, program update will be released after some bug testing, also up next is a paid version that won't disappoint, Hope you all are enjoying the program so far. If you have any comments or suggestions please feel free to message me ?

-soup

Who Soup - February 8, 2014, 2:42 pm

Thanks soup, lmk how much premium is, I'm loving this program and will be more than happy to buy prem. it's not over like \$50 right? lolol

Who Soup - February 13, 2014, 2:17 pm

(Feb 8, 2014 03:42 PM)Xchon Wrote: [\[CITE\]](#) Thanks soup, lmk how much premium is, I'm loving this program and will be more than happy to buy prem. it's not over like \$50 right? lolol

Premium is almost ready for release, it will be sold for \$15 a copy. I'll keep you updated though

JeRM - February 24, 2014, 2:40 pm

thanks a bunch man. i was struggling finding something to use for cracking.

id like to possibly donate or purchase if you will, advance features or private programs.

you're the shit! PM me if interested.

Whats up with the .exe? It will not work once being extracted with 'ilovesoup' password.

It says it is an invalid win32 application!

#Derp - February 25, 2014, 11:10 pm

This doesn't look too bad. I'll try it out.

JeRM - February 26, 2014, 1:19 pm

(Feb 26, 2014 12:10 AM)#Derp Wrote: [\[CITE\]](#) This doesn't look too bad. I'll try it out.

Did it open for you? Because it sure didnt for me.

JeRM - February 27, 2014, 2:35 pm

Thats what I'm thinking! Fml

Can we get any other response?

Who Soup - March 1, 2014, 4:33 pm

Hey guys, no it's not backdoored you can scan it with <http://www.virustotal.com> if you don't trust the report. Also if you look at rep and previous comments it worked for a lot of people. What error are you getting? or is it just not opening?

And Thank you for the people who posted your errors. Here are a few common reasons you may be receiving the "Invalid win32 application!" error.

- 1.You are trying to tamper with the program in which case it destructs; Meaning the program will not allow access/erase the code if tampered with.
- 2.You don't have .net framework 4.5
- 3.You don't have over 1g ram to support this program.

I hoped this helped, if not please feel free to PM me or post!

Thank You guys for the responses, sorry again my responses were slow I didn't know people were still interested in this!

Much love ?
-Soup

HellBender - March 6, 2014, 2:13 am

Worked for me, The only thing is the first site used for scraping worked fine, but the program stops working if you add the other two scraping sites.

Who Soup - March 8, 2014, 7:02 pm

Who Soup - April 2, 2014, 10:54 pm

New program being released probably tomorrow, I think you guys will be stoked!

TRH4CK - April 4, 2014, 3:30 pm

Damn I am getting some weird errors after it scraped ...

Who Soup - April 4, 2014, 10:55 pm

(Apr 4, 2014 03:30 PM)TRH4CK Wrote: [\[CITE\]](#) Damn I am getting some weird errors after it scraped ...

Yes, we created a patch for this error, the problem is Proxy Nova changed there site. I'm trying to convince the main developer to release it. I will get back to you as soon as possible

very sorry for the inconvenience ?

-Soup

ItsFluffy - April 4, 2014, 11:03 pm

so can this program find elite, HIA proxies?

i need something to find high quality proxies

Who Soup - April 5, 2014, 4:01 pm

(Apr 4, 2014 11:03 PM)ItsFluffy Wrote: [\[CITE\]](#) so can this program find elite, HIA proxies?

i need something to find high quality proxies

Yes it will find Elite, and HIA proxies, you will most likely get around 50 - 100 though If you are looking for thousands of HIA and Elite proxies, this program probably isn't for you, sorry.

We might have to stop maintaining this version of proxy shark, and release an updated version.

We will let you guys know as soon as we find out.

?Creed - April 5, 2014, 4:40 pm

Program stops responding when it is about to scrape proxies :/ I've got a pretty decent setup too.

Who Soup - April 5, 2014, 6:17 pm

(Apr 5, 2014 04:40 PM)?Creed Wrote: [\[CITE\]](#) Program stops responding when it is about to scrape proxies :/ I've got a pretty decent setup too.

Introduction

Hi Creed, This version of Proxy Shark isn't working to it's full potential due to Proxy Nova changing there site's layout over time from when Proxy Shark was first released.

Our Response to your question

We will no longer be updating this version of Proxy Shark (V1.0) due to our expenses out weighing our profits.

Our Future

We are deeply sorry for this inconvenience and we will releasing a version 2.0 (Free Version) after our purchase of L33t membership, in a few months. Version 2 will have the following updates:

- Proxy Nova Fix
- 15+ new sites
- In app updates/requests
- Possible GUI
- 24 hour scrape function (Which gives you an updated list constantly)
- Updated Proxy Checking process
- Elite Proxy only function
- [Premium Version for \$10]:
- All of the above and....
- Advance database (a LOT of computers with a LOT of processing power cycles through all possible combinations of IPs (4B) and ports and posts only those that have a response time of 2 seconds or less [This may be discontinued depending on the demand of this service, due to it's high cost of resources])
- 24 hour support
- very large list (2M) of proxies with a response time less than 10 seconds [Constantly Updated in 4 different text formats { .Rtf, Txt, Doc, PDF}]
- Set your own website and parameters (with save function)
- Much Much more.

I will open up a thread in the future for discussion before release.

To fix Your Current Problem

You may be able to scrape other sites (Other than Proxy Nova [index 0]) by just leaving it out of the options.

Conclusion

We are deeply sorry for the inconvenience, and we will release an updated version as soon as possible. Thank you guys for your support with this Proxy Shark project, and other programs we have released. (We got a little over 500 dowloads on proxy shark V1.0!) We very much appreciate it more than you guys know!

This thread is amost a year old and people constantly inquire about proxy shark ?

If i decide to release another free version of proxy shark i'll probably make a brand mew thread because the current version is epic af. Thanks for all the love with this project and sorry i've been slacking as it takes me some time to code hq apps and money has been really tight with me. In the neer future i'm looking to release a few more useful tools as well as upgraded exclusive applications (maybe even a ub3r only proxy shark).

I will be sure to keep everyone updated on my ventures

Again thank you and everyone for so much love and support on the proxy shark project and all of my other projects; your appreciation is well noticed and used to fuel these projects.

ok thanks for legit reply

the issue i have which is why i was interested is because im desperate to find good, reliable proxies to use for my L7 methods on my stresser... u think downloading this version will work for me or u have other tips?

Who Soup - November 18, 2014, 4:04 pm

(Nov 18, 2014 04:15 PM)ItsFluffy Wrote: [\[CITE\]](#) ok thanks for legit reply

the issue i have which is why i was interested is because im desperate to find good, reliable proxies to use for my L7 methods on my stresser... u think downloading this version will work for me or u have other tips?

Well, the newer version has the proxy nova fix (proxy nova; index 0 doesn't work on this version). It's also a lot faster. I was thinking of integrating a feature where if you leave it on you can set your parameters and how often you'd like it to update the list, and it will constantly give you fresh working proxies. In this newer version I also updated the checking method to insure that they are working, other than checking the source for a key this version also checks the actual request to see if it's returning the right httprequest (200's, 300's) oppose to 404's which would = a bad request.

Depending on what language your stresser is maybe we can collaborate and find a solution to your problem. ?

ItsFluffy - November 18, 2014, 10:42 pm

the current source is a mix of css html and php (Laravel)
once i get the new source it will be mostly php

the newer version sounds infinitely better and something i could rele use
i have the scripts for L7 methods but no know how on how to get proxies but your stuff sounded like it might work
